INTRODUCTION

This profile of the aboriginal population presents a set of demographic and socio-economic characteristics for the aboriginal population residing in a variety of locations other than Indian Reserves and Settlements in 1986.

The aboriginal population in these tables is based on respondents' answers to the following ethnic or cultural origin question in the 1986 Census: "To which ethnic or cultural groups(s) do you or did your ancestors belong? (Mark as many as apply)".

As indicated, respondents were asked to identify their ancestral origins and persons with aboriginal origins could check the following groups: North American Indian, Metis, or Inuit, or they could write in their ancestry (see Appendix 3 for a full presentation of the question). In this report, the total aboriginal population count consists of anyone who reported one or more aboriginal origins including persons who reported themselves as having both aboriginal and non-aborginal origins. Those aboriginals shown in this report as "Single Responses" gave only one of the following responses: North American Indian, or Metis, or Inuit.

Organization of the Publication

This report is divided into two volumes. Both volumes contain a complete set of profiles for the aboriginal population residing off-reserve at the Canada, provincial and territorial levels (Table 1) and all Census Metropolitan Areas (CMAs) (Table 2). Volume 1 only contains the profile for aboriginals in Census Agglomerations (Table 3) and Census Sudivisions (Table 4) in provinces from Newfoundland to Ontario, inclusively, while Volume 2 contains the profile for these two types of areas for the western provinces and the two territories.

INTRODUCTION

Ce profil de la population autochtone présente un ensemble de caractéristiques démographiques et socio-économiques de la population autochtone vivant ailleurs que dans les réserves indiennes et les établissements indiens, en 1986.

La population indienne représentée dans ces tableaux a été établie à partir des réponses à la question du recensement de 1986 portant sur l'origine ethnique ou culturelle: "A quel(s) groupe(s) ethnique(s) ou culturel(s) appartenez-vous ou vos ancêtres appartenaient-ils? (Cochez ou précisez olus d'un s'il va lieu')"

Les répondants devaient déclarer leurs origines ancestrales et les personnes d'origine autochtone pouvaient cocher l'un des groupes suivants: Indien de l'Amérique du Nord, Métis ou Inuit, ou encore indiquer leur appartenance ancestrale. Ila question figure à l'annexe 3). Dans le présent rapport, le chiffre total de la population autochtone comprend toute personne ayant déclaré au moins une origine autochtone, y compris les personnes qui ont indiqué possèder à la fois une origine autochtone et une origine non autochtone. Les autochtones qui n'ont indiqué que l'une des réponses suivantes: Indiend de l'Amérique du Nord, Métis ou Inuit, sont considérés ici comme ayant donné une "réponse unique".

Organisation de la publication

Ce rapport est formé de deux volumes contenant chacun un ensemble complet de profils sur la population autochtone vivant hors des réserves au Canada, dans les provinces et les territoires (Tableau 1) et dans les régions métropolitaines de recensement (RMR) (Tableau 2). Le volume 1 contient seulement le profil des autochtones habitant dans les agglomérations de recensement (Tableau 3) et les subdivision de recensement (Tableau 4), pour les provinces de Terre-Neuve à l'Ontario inclusivement, alors que le volume 2 contient le profil des autochtones habitant ces secteurs, pour les provinces de l'Ouest et des deux territoires.

In each of the four tables the geographic areas run across the top of the page. See Geographic Index on page ix for area names.

GEOGRAPHIC AND CONTENT CONSIDERATIONS

Count discrepancies between 100% data and 20% sample data: Counts of the population, sex and age, marital status and mother tongue shown in tabulations based on a 20% sample may differ from those collected on a 100% basis for the following reasons:

- (1) The exclusion of institutional residents: Institutional residents are defined as those individuals other than staff members and their families who live in institutional collective dwellings such as homes for the elderly, hospitals and correctional institutions. Detailed sample data were not collected from this sector of the population.
- (2) Weighting: Data collected on a sample basis were weighted up to provide estimates of the entire population. However, weighted counts are subject to sampling variability. This means, for any given area, the weighted count may differ from that shown in tabulations containing data collected on a 100% basis. While the differences are relatively small for geographic areas with large populations, they can be greater for areas with small populations. For further information on this topic, please contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A OT6 (613) 951-6929.

Users should also be aware that differences in counts may be due to the different subpopulations or universes for which the data are reported. For example, mobility data are reported for persons 5 years and over excluding those temporarily residing overseas; education and labour force data are reported for persons 15 years and over. Furthermore, data may be produced for subsets of these education and labour universes such as total labour force, employed labour force, etc. The 1986 Census Dictionary (Catologue No. 99-101E or P. Census Dictionary (Catologue No. 99-101E or P.

Dans chacun des quatre tableaux les régions géographiques sont mentionnées au haut de la page. Voir index géographique à la page ix pour les noms des régions.

FACTEURS DE GÉOGRAPHIE ET DE CONTENU

Divergences des chiffres entre les données intégrales et les données-échantillon (20%): Les chiffres de la population, selon le sexe et l'age, l'état matrimonial et la langue maternelle des tableaux utilisant les données-échantillon (20%) peuvent différer des données intégrales pour les raisons suivantes:

- (1) L'exclusion des pensionnaires d'institution: Ces derniers sont définis comme les personnes autres que les membres du personnel et de leurs familles qui vivent dans les logements collectifs tels que les foyers pour personnes âgées, les hôpitaux et les établissements de correction. On n'a pas recueilli de données-échantillon détaillées pour ce segment de la population.
- (2) Pondération: Les données-échantillon sont pondérées afin d'obtenir des estimations de la population tout entière. Cependant, les chiffres pondérés se caractérisent par de la variabilité d'échantillonnage, ce qui signifie que pour toute région donnée, le chiffre pondéré peut différer de celui qui figure dans les tableaux contenant les données intégrales. Bien que les différences soient relativement faibles pour les régions géographiques ayant de fortes populations, elles peuvent être plus importantes dans le cas des régions avec de petites populations. Pour plus de renseignements sur ce sujet, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Les utilisateurs doivent également noter que les différences de chiffres peuvent s'expliquer par les différences de sous-population ou d'univers dont les données sont publiées. Ainsi, les données de la mobilité sont publiées pour les personnes âgées de cinq ans et plus, excluant celles qui résident temporairement outre-mer; les données sur la scolarité et l'activité ne sont déclarées que pour les personnes âgées de 15 ans et plus. De plus, des données peuvent être produites pour les sous-ensembles de ces univers de la scolarité et de

provides more detailed information on universes or subpopulations by variable.

l'activité tels que la population active totale, la population active occupée, etc. Le Dictionnaire du recensement de 1986 (no 99-101 F ou E au catalogue) contient plus de renseignements détaillés sur les univers ou les sous-populations par variable.

Incompletely enumerated Indian reserves and Indian settlements: On some Indian reserves and Indian settlements, 1986 Census enumeration was not permitted or was interrupted. Therefore, data are not available for these reserves and the tables have been noted accordingly. This issue is discussed more fully in the SPECIAL NOTES section.

Réserves indiennes et établissements indiens partiellement dénombrés: Dans certaines réserves indiennes et établissements indiens, les recenseurs n'ont pas eu la permission d'effectuer le dénombrement en 1986 ou ont dû l'interrompre. Les données ne sont donc pas disponibles pour ces réserves et des notes apparaissents bon le besoin. Pour des précisions à ce sujet, voir la section NOTES SPÉCIALES.

Additional information on geographic and content considerations, definitions of terms, explanations of data quality, etc., may be found at the end of this publication immediately following the tables. This information is presented separately in English and French sections for easier use.

Vous trouverez d'autres renseignements complémentaires sur les facteurs de géographie et de contenu, la définition détaillée des termes, des précisions sur la qualité des données, etc., à la fin de la publication, immédiatement après les tableaux. Ces renseigne-ments sont présentés dans des sections française et anglaise distinctes, ce qui en facilite la consultation.

1986 CENSUS PRODUCTS AND SERVICES

The 1986 Census product line is designed to serve the diverse needs of our users. Using as a base the most demanded publications of past censuses, a full series of data, reference and analytical publications will be offered.

In addition to the tabulations shown in publications, census data are available in machine-readable form. In particular, there is a set of 44 basic summary tabulations for small geographic areas including enumeration areas, census tracts and census subdivisions. The data contained in the published profiles for census subdivisions and census divisions, census tracts, federal electoral districts, census metropolitan areas and census agglomerations are also available in machine-readable form.

While many tabulations are available from the planned output program, census tabulations can also be customized to individual users' needs. A range of products is offered, from predetermined basic data tabulations available for user-selected geographic areas, to complete custom tabulations which are developed to the exact requirements of the client. The products thus offer, on a cost-recovery basis, varying levels of flexibility in content, geography and medium.

REFERENCE PRODUCTS

Users, who may require assistance in understanding and interpreting the data and geographic concepts appearing in this set of tabulations, should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F). The Dictionary provides a range of definitions for all variables and terms used in 1986 Census data products.

Maps showing the names, boundaries and location of geographic areas appearing in this set of tabulations are shown in the Reference Map publication (Catalogue No. 99-115).

PRODUITS ET SERVICES DU RECENSEMENT DE 1986

La gamme des produits du recensement de 1986 doit répondre aux besoins variés de nos utilisateurs. En fonction des publications les plus populaires des derniers recensements, nous offirions une série complète de données, de documents de référence et d'ouvrages analytiques.

En plus des totalisations présentées dans les publications, les données du recensement sont disponibles sous forme lisible par machine. Notamment, une série de 44 totalisations sommaires de base existe pour les petites régions géographiques comprenant les secteurs de dénombrement, les secteurs de recensement et les subdivisions de recensement. Les données contenues dans les profils publiés pour les subdivisions de recensement et les divisions de recensement et les divisions de recensement et les divisions de recensement fédérales, les régions métropolitaines de recensement et de sagjomérations de recensement sont également disponibles sous forme lisible par machine.

Même si plusieurs totalisations sont disponibles à partir du programme des produits déjà établi, des totalisations du recensement peuvent également être personnalisées selon les besoins de l'utilisateur. Il est possible de se procurer une gamme de produits allant des totalisations de données fondamentales, déterminées à l'avance, disponibles pour les régions géographiques choisies par l'utilisateur, à des totalisations entièrement personnalisées et préparées selon les exigences précises du client. Ainsi, ces produits permettent d'offirir, contre recouvement des coûts, différents niveaux de souplesse en matière de contenu, de géographie et de support.

PRODUITS DE RÉFÉRENCE

Les utilisateurs qui ont besoin d'aide pour comprendre et interpréter les données et les concepts géographiques figurant dans cette série de totalisations peuvent consulter le Dictionnaire du recensement de 1986 (nº 99-101F ou E au catalogue). Le dictionnaire donne les définitions de boutes les variables et de tous les termes utilisés dans les produits du recensement de 1986. Les cartes sur lesquelles sont indiqués le nom, les limites et l'emplacement des régions géographiques mentionnées dans cette série de totalisations sont comprises dans la publication intitulée Carte de référence (nº 99-115 au catalogue). Further details on the products and services available from the census are provided in the 1986 Census Products and Services – Final Edition (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. A representative will be glad to help. Addresses and phone numbers are listed on page xlvii.

Additional Data Products and Reports

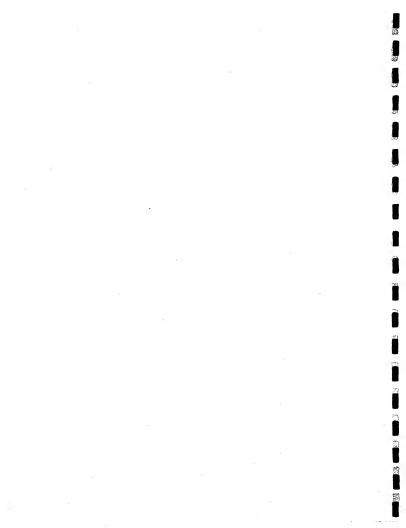

- "Summary Tabulations of Ethnic and Aboriginal Origins, Canada, Provinces, Territories and Census Metropolitan Areas" – December 1987. Available from the nearest Statistics Canada Regional Office.
- Demographic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements or Communities) - February 1988. Available from the nearest Statistics Canada Regional Office.
- "Socio-Economic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements, or Communities)" – March, 1989. Available from the nearest Statistics Canada Regional Office.
- "Canada's Aboriginal Population by Census Subdivision from the 1986 Census" – March 1989. Available from the nearest Statistics Canada Regional Office.

DEFINITIONS

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F) for the full definitions and additional remarks related to these concepts and definitions

GEOGRAPHIC TERMS:

CENSUS AGGLOMERATION (CA)

Concept and General Criteria

The general concept of a census agglomeration (CA) is one of a large urbanized core, together with adjacent urban and rural areas which have a high degree of economic and social integration with that core.

A CA is defined as the main labour market area of an urban area (the urbanized core) of at least 10,000 population, based on the previous census. Once a CA attains an urbanized core population of at least 100,000, based on the previous census, it becomes a census metropolitan area (CMA).

CAs are comprised of one or more census subdivisions (CSDs) which meet at least one of the following criteria:

- the CSD falls completely or partly inside the urbanized core;
- (2) at least 50% of the employed labour force living in the CSD works in the urbanized core; or
- (3) at least 25% of the employed labour force working in the CSD lives in the urbanized core.

Regular and Consolidated CAs

In some parts of the country, adjacent CAs are socially and economically interrelated. When this occurs, they are grouped into a single consolidated CA. A regular CA, on the other hand, is free-standing. It is either not adjacent to another CA or not sufficiently related to another CA to be consolidated.

To be aligible for consolidation, the total commuting interchange between the adjacent CAs must be equal to at least 35% of the labour force living in the smaller CA. After consolidation, the original CAs become subregions (called primary CAs) within the consolidated CA.

Additional Criteria and Procedures for Inclusion of CSDs in CAs

In addition to criteria (1), (2) and (3) outlined above, the following criteria are applied to determine if a CSD is to be included:

- (4) If the commuting flow is less than 100 persons, CSDs are excluded from the CA, even if criteria (2) or (3) apply.
- (5) Even if criteria (2), (3) or (4) apply, CSDs may be included or excluded to maintain the contiguity of the CA.
- (6) CSD components of census-tracted CAs are retained for historical comparability even if they no longer meet criteria (2) or (3).

All the above criteria have been ranked in priority order. A CSD meeting the criteria for two or more CMAsCAs is included in the CMA or CA for which it has the highest ranked criterion. If the CSD meets criteria that have the same rank, the decision is based on the actual population or on the number of commuters in volved.

Exceptions to the above delineation criteria may occasionally be made in certain special situations.

Users should be aware that CA boundaries may not conform precisely with the main labour market area, since CAs must respect CSD limits.

CENSUS METROPOLITAN AREA (CMA)

Concept and General Criteria

The general concept of a census metropolitan area (CMA) is one of a very large urbanized core, together with adjacent urban and rural areas which have a high degree of economic and social integration with that core.

A CMA is defined as the main labour market area of an urban area (the urbanized core) of at least 100,000 population, based on the previous census. Once an area becomes a CMA, it is retained in the program even if its population subsequently declines.

Smaller labour market areas, centred on urbanized cores of at least 10,000 population, are included in the census agglomeration (CA) program.

CMAs are comprised of one or more census subdivisions (CSDs) which meet at least one of the following criteria:

- the CSD falls completely or partly inside the urbanized core:
- (2) at least 50% of the employed labour force <u>living</u> in the CSD <u>works</u> in the urbanized core; or
- (3) at least 25% of the employed labour force working in the CSD lives in the urbanized core.

Regular and Consolidated CMAs

In some parts of the country, adjacent CMAs and CAs are socially and economically interrelated. When this occurs, they are grouped into a single consolidated CMA. A regular CMA, on the other hand, is free-standing. It is either not adjacent to another CMA or CA or not sufficiently related to another CMA or CA to be consolidated.

To be eligible for consolidation, the total commuting interchange between the adjacent CMAs and CAs must be equal to at least 35% of the labour force living in the smaller CMA or CA. After consolidation, the original CMAs and CAs become subregions (called <u>primary</u> CMAs and CAs) within the consolidated CMA.

Additional Criteria and Procedures for Inclusion of CSDs in CMAs

In addition to criteria (1), (2) and (3) outlined above, the following criteria are applied to determine if a CSD is to be included in the CMA:

- (4) If the commuting flow is less than 100 persons, CSDs are excluded from the CMA, even if criteria (2) or (3) apply.
- (5) Even if criteria (2), (3) or (4) apply, CSDs may be included or excluded to maintain the contiguity of the CMA.
- (6) CSD components of census-tracted CMAs are retained for historical comparability even if they no longer meet criteria (2) or (3).

All the above criteria have been ranked in priority order. A CSD meeting the criteria for two or more CMAs/CAs is included in the one for which it has the highest ranked criterion. If the CSD meets criteria that have the same rank, the decision is based on the actual population or on the number of commuters involved.

Exceptions to the above delineation criteria may occasionally be made in certain special situations.

Users should be aware that CMA boundaries may not conform precisely with the main labour market area, since CMAs must respect CSD limits. CMAs may also differ from metropolitan areas designated by local authorities for planning or other purposes.

GEOSTATISTICAL AREA

Refers to geographic areas delineated or employed for the tabulation and dissemination of census data. This term applies to provinces and territories, census divisions, census subdivisions, census metropolitan areas, census agglomerations, primary census metropolitan areas, primary census agglomerations, census tracts, provincial census tracts, urban areas, federal electoral districts and enumeration areas.

INDIAN RESERVE

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

INDIAN SETTLEMENT

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

PROVINCE

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincal tables include the Yukon Territory and the Northwest Territories.

CENSUS CONCEPTS:

AGE

Refers to the age at last birthday (as of the census reference date, June 3, 1986). This variable is derived from the date of birth question which asks day, month and year of birth. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

AVERAGE EMPLOYMENT INCOME

Average employment income of individuals refers to the weighted mean total employment income of individuals 15 years of age and over who reported employment income for 1985. Average employment income is calculated from unrounded data by dividing the aggregate employment income of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with employment income in that group.

AVERAGE INCOME OF INDIVIDUALS

Average income of individuals refers to the weighted mean total income of individuals 15 years of age and over who reported income for 1985. Average income is calculated from unrounded data by dividing the aggregate income of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with income in that group.

CENSUS FAMILY

Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in most census family tables.

CLASS OF WORKER

This variable classifies persons who reported a job into those who (i) worked mainly for someone else for wages, salaries, commission or payment in kind, (ii) worked without pay in a family farm, business or professional practice owned or operated by a related household member, (iii) worked mainly for

themselves, with or without paid help. The job reported was that in the week prior to enumeration if employed, or the job of longest duration since January 1, 1985 if not employed during the reference week. Persons with two or more jobs in the reference week were to provide information for the job at which they worked the most hours.

Note: Self-employed persons in incorporated companies in 1971 and 1981 Census publications are normally included in the paid worker category to permit comparisons with surveys of establishments and the System of National Accounts. In 1986 Census publications, where space permits, self-employed persons whose farms or businesses were incorporated are shown separately.

ECONOMIC FAMILY

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage or adoption. Persons living common-law are considered, for census purposes, as now married regardless of their legal marital status; they accordingly appear as married couples in the economic family tables.

ECONOMIC FAMILY STATUS

Refers to the classification of population in terms of whether or not they are members of an economic family.

Economic family persons refers to household members who are members of an economic family.

<u>Unattached individuals</u> refers to household members who are not members of an economic family. A person living alone is always an unattached individual

EMPLOYED

Refers to persons who, during the week prior to June 3, 1986:

- (a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
- (b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.

Data are available for persons 15 years of age and over, excluding institutional residents.

EMPLOYMENT INCOME

Refers to total income received by persons 15 years of age and over during 1985 as wages and salaries, net income from non-farm self-employment and/or net farm income

EXPERIENCED LABOUR FORCE

Derived by deleting from the total labour force those unemployed persons 15 years of age and over who have never worked or who had worked only prior to January 1, 1985.

FULL-TIME OR PART-TIME WEEKS WORKED IN 1985

Refers to persons who worked in 1985. These persons were asked to report whether the weeks they worked in 1985 were full weeks of work or not. Persons with a part-time job for part of the year were to report the information for the job at which they worked the most weeks. Data are available for persons 15 years of age and over who worked in 1985, excluding institutional residents.

HOME LANGUAGE

Refers to the language spoken at home by the individual at the time of the census. If more than one language was spoken, the language spoken most often by the individual was to be reported.

In 1986, the following instructions were provided to respondents:

"You should report the language you yourself speak most often at home. If you are answering for someone else, report the language that he/she speaks most often.

If you speak two languages equally often, report both.

For a child who has not yet learned a language, report the language spoken most often at home. If two languages are used equally often, report both. If you are mute, report the language you use most often at home to make yourself understood

If you live alone, report the language in which you feel most comfortable.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as applicable."

INCIDENCE OF LOW INCOME

(See "Special Notes".)

INDUSTRY (BASED ON THE 1980 CLASSIFICATION)

Refers to the general nature of the business carried out in the establishment where the person worked, as indicated by the name of the employer and the kind of business, industry or service. Data are available for persons 15 years of age and over, excluding institutional residents. If not employed in the week prior to enumeration, the information relates to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Census industry data based on the 1980 Standard Industrial Classification have three levels of aggregation. There are 18 divisions (labelled A to R) which are subdivided into 75 major groups, which are, in turn, subdivided into 296 detailed classes.

Direct comparisons between 1986, 1981 and 1971 Census industry data are possible, based on the 1970 SIC. For further information refer to the definition of INDUSTRY (based on the 1970 classification) in the 1986 Census Dictionary (Cat. No. 99-101E).

INEXPERIENCED LABOUR FORCE

The inexperienced labour force consists of unemployed persons 15 years of age and over who have never worked or worked only prior to January 1, 1985.

INSTITUTIONAL RESIDENT

Refers to a resident of an "institutional" collective dwelling, other than staff members and their families.

"Institutional" collective dwellings are orphanages and children's homes, special care homes and institutions for the elderly and chronically ill, hospitals, psychiatric institutions, treatment centres and institutions for the physically handicapped, correctional and penal institutions, young offenders facilities and jails.

LABOUR FORCE ACTIVITY

Refers to the labour market activity of the working age population who, in the week prior to June 3, 1986, were employed or unemployed. The remainder of the working age population is classified as not in labour force. Data are available for persons 15 years of age and over, excluding institutional residents.

MARITAL STATUS

Refers to the conjugal status of a person.

Now married (excluding separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married".

Separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

Divorced

Persons who have obtained a legal divorce and who have not remarried.

Widowed

Persons who have lost their spouse through death and who have not remarried.

Never married (single)

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage was annulled.

MEDIAN INCOME OF INDIVIDUALS

The median income of a specified group of individuals is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of individuals are below the median, while those of the second half are above the median.

MOBILITY STATUS

Refers to the relationship between a person's usual place of residence on Census Day and his/her usual place of residence five years earlier. On the basis of this relationship, the population is classified as non-movers and movers (mobility status). Within the category movers, a further distinction is made between non-migrants and migrants (migration status).

Non-movers are persons who, on Census Day, were living in the same dwelling they occupied five years earlier.

Movers are persons who, on Census Day, were living in a different dwelling than the one they occupied five years earlier.

Non-migrants are movers who, on Census Day, were living within the same census subdivision (CSD) they resided in five years earlier.

Migrants are movers who, on Census Day, were residing in a different CSD within Canada five years earlier (<u>internal migrants</u>) or who were living outside Canada five years earlier (<u>external migrants</u>).

With respect to external migration, immigrants (persons who were residing outside Canada five years earlier but in Canada on Census Day) are counted. Emigrants (persons residing in Canada five years ago but not on Census Day) are not counted.

Interprovincial migration refers to movements from one province or territory to another involving a change of residence. An interprovincial migrant is a person who, in the five-year migration interval, takes up residence in another province or territory. Such a person is an out-migrant with reference to his province or territory of origin, and an inmigrant with reference to his province or territory of destination.

Canadian residents stationed outside Canada in the Armed Forces or the diplomatic service as well as inmates of institutions are excluded from the population universe from which mobility data are collected. As a result they do not appear in any census tables dealing with mobility status. Those aged 0-4 on June 3, 1986 are also excluded from all census tables dealing with mobility status as the five-year reference period precludes this segment of the population.

MOTHER TONGUE

Refers to the first language learned in childhood and still understood by the individual at the time of the census.

In 1986, the following instructions were provided to residents:

"You should report the first language you learned in childhood, that is, before you went to school. If you no longer understand that language, report the second language you learned. If you are answering for someone else, report the first language that he/she learned in childhood.

If you understand more than one language, report the one you learned first. If you learned two languages at the same time, report the language you yourself spoke most often at home. If you used the two languages equally often, report both.

For a child who has not yet learned a language, report the language he/she will first be learning at home. If he/she is learning two languages at the same time, report the one in which he/she is spoken most often. If the two languages are used equally often, report both.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as anolicable".

NOT IN LABOUR FORCE

The Not in Labour Force classification refers to those persons, who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to start work in the reference week, as well as persons who did not

work, did not have a new job to start in four weeks or less, were not on temporary lay-off or did not look for work in the four weeks prior to enumeration. Data are available for persons 15 years of age and over, excluding institutional residents.

OCCUPATION (BASED ON 1980 CLASSIFICATION)

Refers to the kind of work persons were doing during the reference period as determined by their reporting of their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

For the purposes of this profile, the unit group occupations from the Standard Occupational Classification have been regrouped into 13 occupational groups by Employment and Immigration Canada.

Direct comparisons of 1981 and 1986 occupation data are possible. For comparison with 1971 Census data, adjustments must be made to the universe and classification. For further information, refer to the definition of OCCUPATION (based on 1971 classification) in the 1986 Census Dictionary (Cat. No. 99-1015).

OFFICIAL LANGUAGE

Refers to the ability to conduct a conversation in English and French, the official languages of Canada.

It should be emphasized that the official language question data are based on the individual's own assessment of his or her abilities.

In 1986, the following instructions were provided to respondents:

"Do not report French or English learned at school unless you can conduct a conversation of some length on various topics in that language.

For a child who has not yet learned a language, report the language spoken most often at home if it is either English or French. If the two languages are used equally often, report "English and French". If neither language used often, mark "Neither English nor French".

If you are mute, report English, French or both provided you are able to make yourself understood in one or both of these languages."

PARTICIPATION RATE

Refers to the total labour force (in reference week) expressed as a percentage of the total population 15 years of age and over, excluding institutional residents, in an area, group or category.

PRIVATE HOUSEHOLD

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

SCHOOLING: HIGHEST LEVEL OF

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

SCHOOLING: MAJOR FIELD OF STUDY (MFS)

Refers to the predominant discipline or area of learning or training of a person's highest post-secondary degree, certificate or diploma. The major field of study classification structure consists of 10 broad or major categories — educational, recreational and counselling services; fine and applied arts; humanities and related fields; social sciences and related fields; cotial sciences and related fields; cotial sciences and prediction agricultural and biological sciences/technologies; engineering and applied sciences; engineering and applied sciences; engineering and applied sciences; engineering and applied sciences; engineering and applied sciences; engineering and applied sciences. This structure is, in turn, subdivided into over 100 "minor" classification categories and over 425 "unit" groups.

SEX

Refers to the gender of the respondent.

SOURCES OF INCOME

All persons 15 years or over were asked to report their total money income from the following sources during the calendar year 1985:

(a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions, cash bonuses as well as all types of casual earnings in calendar year 1985. The value of taxable allowances and benefits provided by employers such as free lodging, free automobile use, etc., is excluded.

(b) Net Non-farm Self-employment Income

Refers to net income (gross receipts minus expenses of operation such as wages, rents, depreciation, etc.) received during calendar year 1985 from the respondent's non-farm unincorporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons babysiting in their own homes, operators of direct distributorships such as selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hair-dressers, dressnakers, etc.

(c) Net Farm Self-employment Income

Refers to net income igross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1985 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supple-mentary or assistance payments to farmers by federal or provincial governments. However, the value of income in kind", such as agricultural products produced and consumed on the farm is excluded.

(d) Old Age Security Pension and Guaranteed Income Supplement

Refers to Old Age Security pensions and Guaranteed Income Supplements paid to persons 65 years of age and over, and Spouses' Allowances paid to 60 to 64 year-old spouses of Old Age Security recipients by the federal government only during calendar year 1985. Also included are Extended Spouses' Allowances paid to 60 to 64 year-old widows/widowers whose spouse was an Old Age Security pension recipient.

(e) Benefits from Canada/Quebec Pension

Refers to benefits received in calendar year 1985 under the Canada or Quebec Pension Plan, e.g., retirement pensions, survivors' benefits, disability pensions. Does not include retirement pensions of civil servants, RCMP and military personnel or lump-sum death honefits

(f) Family Allowances

Federal as well as provincial allowances paid during calendar year 1985 in respect of children under 18 years of age are included. These allowances, though not collected directly from the respondents, were calculated and included in the income of one of the parents.

(g) Federal Child Tax Credits

Federal child tax credits paid during calendar year 1985 in respect of children under 18 years of age are included. These credits, though not collected directly from the respondents, were calculated and included in the income of one of the parents.

(h) Benefits from Unemployment Insurance

Refers to total unemployment insurance benefits received in calendar year 1985, before income tax deductions. It includes benefits for sickness, maternity, fishing, work sharing, retraining and retirement received under the Federal Unemployment Insurance program.

(i) Other Income from Government Sources

Refers to all transfer payments, excluding those covered as a separate income source (Family Allowances, Federal Child Tax Credits, Old Age Security pensions and Guaranteed Income Supplements, Canada/Quebec Pension Plan benefits and Unemployment Insurance benefits programs in calendar year 1985. This source includes transfer payments received by

persons in need such as mothers with dependent children, persons temporarily or permanently unable to work, elderly individuals, the blind and the disabled. Included are provincial income supplement payments to seniors to supplement Old Age Security and Guaranteed Income Supplement and provincial payments to seniors to help offset accommodation costs. Also included are other transfer payments such as for training under the National Training Program (NTP), veterans' pensions, war veterans' allowance, pensions to widows and dependants of veterans. workers' compensation. Additionally, provincial tax credits and allowances claimed on the income tax return are included.

(j) Dividends and Interest on Bonds, Deposits and Savings Certificates and Other Investment Income

Refers to interest received in calendar year 1985 from deposits in banks, trust companies, co-peratives, credit unions, caisses populaires, etc., as well as interest on savings certificates, bonds and debentures and all dividends from both Canadian and foreign stocks. Also included is other investment income from either Canadian or foreign sources such as net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies.

Retirement Pensions, Superannuation and Annuities

Refers to all regular income received during calendar year 1985 as the result of having been a member of a pension plan of one or more employers. It includes payments received from all annuities, including payments from a matured registered retirement savings plan (RRSP) in the form of a life annuity, a fixed term annuity, a registered retirement income fund or an incomeaveraging annuity contract; pensions paid to widows or other relatives of deceased pensioners; pensions of retired civil servants, Armed Forces personnel and RCMP officers; annuity payments received from the Canadian Government Annuities Fund, an insurance company, etc. Does not include lump-sum death benefits, lump-sum benefits or withdrawals from a pension plan or RRSP or refunds of over contributions.

(l) Other Money Income

Refers to regular cash income received during calendar year 1985 and not reported in any of the other nine sources listed on the questionnaire, e.g., alimony, child support, periodic support from other persons not in the household, net income from roomers and boarders, income from abroad (except dividends and interest), non-refundable scholarships and bursaries, severance pay, royalties, strike pay.

Receipts Not Counted as Income

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump sum settlements of insurance policies, rebates of property taxes and other taxes, and refunds of pension contributions were excluded as well as all income in kind such as free meals, living accommodation, or agricultural products produced and consumed on the farm

Total Income

Total income is the sum of amounts received during 1985 by an income recipient from the sources of income listed above.

STANDARD ERROR OF AVERAGE EMPLOYMENT INCOME

Refers to the estimated standard error of average employment income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that for a group of individuals 15 years and over (e.g., males, 45-54 years of age), the true value (the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates do not include the effects of certain types of response error or systematic or coverage errors.

STANDARD ERROR OF AVERAGE INCOME

Refers to the estimated standard error of average income. It is an estimate of the error introduced into these data due to the fact that they are

collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that for a group of individuals 15 years and over (e.g., males, 45-54 years of age), the true value (the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates do not include the effects of certain types of response error or systematic or coverage errors.

TOTAL INCOME

(See "Sources of Income".)

TOTAL LABOUR FORCE (IN REFERENCE WEEK)

Refers to persons who were either employed or unemployed during the week prior to enumeration (June 3, 1986). Data are available for persons 15 years of age and over, excluding institutional residents.

UNEMPLOYED

Refers to persons who, during the week prior to enumeration:

- (a) were without work, had actively looked for work in the past four weeks and were available for work; or
- (b) had been on lay-off and expected to return to their job; or
- (c) had definite arrangements to start a new job in four weeks or less.

Data are available for persons 15 years of age and over, excluding institutional residents.

UNEMPLOYMENT RATE

Refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week) in an area, group, or category. Data are available for persons 15 years of age and over, excluding institutional residents.

WORK ACTIVITY IN 1985

Refers to the number of weeks which a person worked in 1985 and whether these weeks worked were full time or part time. Data are available for persons 15 years of age and over, excluding institutional residents.

SAMPLING AND WEIGHTING

The 1986 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. (Note that, on Indian reserves and in remote areas, all data were collected on a 100% basis. In the Northwest Territories, data were collected on a 100% basis but, for the communities of Fort Smith, Hay River, Pine Point and Yellowknife, the data were processed on a 20% basis.)

For any given geographic area, the weighted population, household, dwelling or families, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

DATA QUALITY

GENERAL

The 1986 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resultand estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that

users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- coverage errors, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- non-response errors, which result from the fact that responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason:
- response errors, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- processing errors, which can occur at various steps including: coding, when "write-in" responses are transformed into numerical codes by clerks; data capture, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and imputation, when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
- sampling errors, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

COVERAGE ERRORS

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in undercoverage. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in overcoverage. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately, instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunder-Occasionally, someone who is not a Canadian resident may, incorrectly, be enumerated in the census. On average, overcoverage is less likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

In 1986, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant were revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households missed because their dwelling was incorrectly classified as vacant. Secondly, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject

to some undercoverage. For Canada as a whole and for each province, the magnitude of this residual undercoverage in the 1986 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. Undercoverage is offset to some degree by overcoverage errors, and in 1986 for the first time a special study was carried out to investigate overcoverage errors.

OTHER NON-SAMPLING ERRORS

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensuring as complete a response as possible. Census Representatives edit the questionnaires and follow up any missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses are missing. Although missing entries are eliminated during processing, there remains some potential non-response error. This is particularly serious if the non-respondents differ in some respects from the respondents since, as described in a later paragraph, a missing value is replaced by the corresponding entry for a "similar" record. If respondents and non-respondents differ in terms of the characteristics involved, this procedure will result in non-response bias.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as response errors. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire such to obtain a missing response.

Some of the questions on the census document require a verbal response to be written in During regional processing, these "write-in" entries are given a numeric code. Coding errors can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verjoing a sample of each coder's work and taking corrective action where necessary.

After the coding and certain other manual processing steps are complete, the information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of data capture errors. First, certain edits (such as range checks) are performed as the data are keyed. Secondly, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any imputation errors will more or less cancel out when results are tabulated for a sufficiently large geographical area or subgroup of the population.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1986 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1986 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as

birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth, etc.), the responses obtained in the 1986 Census, for a sample of individuals, are being compared with those for the same individuals in the 1981 Census.

Also, following the 1986 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time, however, interviewers asked a series of detailed questions on language, ethnic origin and structural type of dwelling, the responses to which will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

SAMPLING ERRORS

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values this potential error, as proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so called "standard error". This is the square root of the average, taken over all possible samples of the same size and design, of the squared deviation of the sample estimate from the value for the total pooulation.

The table below provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error

Table: Approximate Standard Error Due to Sampling for 1986 Census Sample Data

| | • | | | | | Cell ' | Value | | | | | |
|-------------------|----|-----|-----|-----|-------|--------|-------|--------|--------|--------|---------|---------|
| Approximate | 50 | 100 | 200 | 500 | 1,000 | 2,000 | 5,000 | 10,000 | 20,000 | 50,000 | 100,000 | 500,000 |
| Standard Error | 15 | 20 | 30 | 45 | 65 | 90 | 140 | 200 | 280 | 435 | 600 | 1,300 |

table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be 1,000 + or - 3455 or 1,000 + or - 1951.

The standard errors given in the table below will not apply to population or universe (persons, households, dwellings or families) totals or subtotals for the geographic area under consideration (see Sampling and Weighting). The effect of sampling for these cells can be determined by comparison with a corresponding 100% publication.

The effect of the particular sample design and weighting procedure used in the 1986 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table below may, therefore, understate or overstate the error due to sampling.

For further information on the quality of census data, contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant

error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data.

Of concern to some users is that small cell counts may suffer a significant distortion as a result of random rounding. This distortion is the protection against disclosure and individual data cells containing these small numbers may lose their precision as a result. Since the rounding is of a random nature, however, when data cells are reaggregated by the user, the rounding errors tend to cancel out. Distortions may be further reduced by building in the appropriate subtotals into tabulations Also available is the option of requesting custom tabulations from the census microdata bases. With custom products, random rounding occurs after data cells have been aggregated thus minimizing any distortion.

In addition to random rounding, procedures such as area and cell suppression have been adopted to further protect the confidentiality of individual responses.

With area suppression, all characteristic data for the geographic area are deleted and replaced with the symbol (XXX). The extent to which data are suppressed depends upon whether the area is a standard geographic area, i.e. aggregated from enumeration areas (federal electoral districts, census divisions, census subdivisions, census tracts, etc.) or a non-standard area specified by the user for a custom tabulation. Data are deleted if the population is less than 40 persons for standard areas and less than 100 persons for non-standard areas. For tables involving income distributions.

the suppression of data is extended to geographic areas with a total population of less than 250. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary data products, semi-custom and custom data products) collected on a 100% or 20% sample basis.

Note: For data collected on a 20% sample basis, area suppression is based on the noninstitutional population rather than the total population since sample data were not collected for the institutional population.

With cell suppression, the minimum acceptable value for a cell is specified. All cell values below the designated cut-off are deleted and replaced by the symbol (XXX). However, the suppressed data are included in the appropriate higher aggregate subtotals and totals. For 1986 data products, two different methods of cell suppression are being implemented. For publications in "The Nation" and "Dimensions" series involving income, detailed occupation or detailed industry, the distribution is being suppressed where less than 250 persons or units are involved. In semi-custom and custom tabulations of variables collected on a sample basis, all gells with a value of "5" (after random rounding) are being suppressed.

SPECIAL NOTES

ADJUSTMENTS TO GEOSTATISTICAL AREAS

Users should be aware that census geostatistical areas are subject to change from one census to the next. Therefore, when using data from two or more censuses, the user must be aware of, and take into consideration, any changes to the geographic limits of the areas being compared. Users wishing to obtain additional information in this regard should refer to the documents previously mentioned under "Reference Products" or contact Geography Information Services. Statistics Canado.

GEOGRAPHIC REFERENCE DATE

All data reported are based on the boundaries in effect on January 1, 1986 provided that the information and documentation regarding these boundaries were in the hands of Statistics Canada by March 1, 1986.

POPULATION COUNTS BASED ON USUAL RESIDENCE

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada. In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

INCOMPLETELY ENUMERATED INDIAN RESERVES AND INDIAN SETTLEMENTS

On some Indiam reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of the reserves or settlements are therefore footnoted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (e.g., percentage change) between 1981 and 1986 are no exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

While it is not possible to estimate the population each incompletely enumerated reserve, estimates of the missed total population and total occupied dwellings at the provincial level have been made and are shown in Appendix 1.

Note, however, that it was not possible to estimate any characteristics of the missed population, even at the provincial level.

Additional information on this subject can be obtained by referring to the User Information Bulletin, Number 1, "Summary of the Methodology for Estimating the Population and Occupied Private Dwellings on Incompletely Enumerated Indian Reserves".

A list of incompletely enumerated Indian reserves and Indian settlements is shown in Appendix 2 together with the province, census division and, where applicable, the census metropolitan area or census agglomeration (CMA/CA) in which each is located.

MOBILITY STATUS

The geographic areas reflect boundaries as of January 1, 1986, the geographic reference date for the 1986 Census of Canada.

The counts for total "migrants" (a migrant is anyone who, five years earlier, did not have his/her usual place of residence within the CSD where he/she was enumerated) are additive across any geographic level - e.g., the migrant count at the Canada level is the sum of the migrants at the provincial level

Details of intercensal boundary changes can be found in the **Standard Geographical** Classification (Cat. No. 12-573).

Boundaries and CSD components of CMAs and CAs will often undergo modifications during the intercensal period; therefore, comparisons of data for specific areas between any two censuses will not be valid unless these changes are accounted for A publication is available which provides comparisons of 1986 CMAs and CAs, and their 1981 versions. Census Metropolitan Areas and Census Agglomerations: A 1986 and 1981 Comparison (Cat. No. 99-105E or P) lists census subdivisions that make up the 1986 version of each CMA and CA, and shows corresponding delineations for 1981.

COMPARABILITY AND QUALITY OF DATA ON LANGUAGE

Comparison between 1981 and 1986

Mother tongue and home language. The language questions were the same in the last two censuses, but the instructions to respondents were modified for mother tongue and home language. In 1981, respondents were asked to indicate only one mother tongue and only one home language; envertheless, 597,980 persons (2.5% of the population) reported more than one mother tongue and 535,735 persons (2.2% of the population) reported more than one home language;

To better reflect the linguistic reality in Canada, these instructions were dropped from the 1986 Census. Under the new guidelines, individuals could report more than one mother tongue if they had learned them at the same time and had spoken one as frequently as the other when they were children. Similarly, respondents could indicate more than one home language if they were now speaking them could ly often at home.

The number of multiple responses given in the 1988 Census was significantly higher than in the 1981 Census. In 1986, 954,940 persons or 3.8% of the population reported a multiple response to the mother tongue question, while 1,159,675 or 4.6% of the population indicated more than one home language.

This increase was the result either of the changes made in the questionnaire, of changes in the way in which the population answers language questions or of an increase in the number of persons who had more than one mother tongue or spoke more than one language at home. A combination of these factors may also explain the increase in multiple responses.

When the 1981 data were processed, only one language was retained for publication, even in cases where the respondent reported more than one. In 1986, responses indicating more than one language were accepted.

In order to facilitate the determination of the trends between the two censuses, the 1986 Census results have been adjusted. In cases where more than one language was reported, the multiple responses were distributed among the component languages in the same proportions as in the 1981 Census. The results have been published in a special document entitled "Adjusted Language Data", April (1988). Also, data from the 1981 Census have been adjusted to show the multiple responses reported at that time. The data for the census metropolitan areas are presented in Table 3 (mother tongue) and Table 8 (home language) of this publication. These adjustments to the mother tongue and home language figures make it easier to relate the 1986 data to the 1981 data, but do not make the results of the two censuses entirely comparable. Consequently, considerable care must be exercised in the interpretation of changes between 1981 and 1986.

The 1986 classification of languages differs from that used in 1981, especially with regard to the aboriginal languages. Appendix B of the 1986 Census Dictionary (Catalogue No. 99-101E) provides a description of the changes.

Official language. Some respondents report speaking English or French or both at home, while on the other hand they indicate in the official language question, that they cannot carry on a conversation in these languages.

In such cases, in the 1981 Census, the answer to the official language question was considered erroneous. Consequently, during data processing, this answer was changed to show that the person could speak the official language(s) they had reported to the home language question.

In the 1986 Census, not all of these responses were considered erroneous. If the respondent indicated being able to speak only one official language – either English or French – and this language matched the person's mother tongue, no correction was made during processing. Consequently, these response patterns appear as such in the 1986 tabulations

Aboriginal languages. Users should be aware that the data for some Indian reserves and Indian settlements are not available (see special note "Incompletely Enumerated Indian Reserves and Indian Settlements"). Among the population who participated in the 1986 Census, 138,000 persons reported a single aboriginal language as mother tongue and 97,000 persons reported a single aboriginal language as home language. Respondents who reported "Indian" as a language were classified in the "Amerindian languages, not included elsewhere (n.i.e.)" category. This category consists of 8,000 persons for mother tongue and 5,500 persons for home language. It is included in the total for aboriginal languages. Users should note that for mother tongue data, approximately a quarter of the 8,000 responses classified in this category, at the Canada level, were provided by respondents of Asian origin. This proportion is roughly the same in the Atlantic provinces and British Columbia. It is under 5% in Manitoba, Saskatchewan and the Territories. In Quebec and Alberta, the proportion is higher than the national figure, about 40% and 45% respectively. In Ontario, approximately 2 out of every 3 respondents in this category were of Asian origin. For home language data, the proportion of Asians is higher, about onehalf of the 5,500 respondents at the Canada level. The proportion is also about one-half in Quebec. Approximately 2 out of 3 respondents were of Asian origin in British Columbia and 4 out of 5 in Alberta and Ontario. Again, as was the case for mother tongue, the proportion was below 5% in Manitoba. In the remaining provinces and territories, very few persons reported "Indian" as their home language.

For further information on language data, contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Canada K1A 0T6.

INCOME DATA

Average income, median income and standard error of average income of population 15 years and over are calculated for persons with income only, but for all census families and private households whether or not they reported any income. Aggregate income calculated from these data should be used with caution as averages were calculated prior to rounding. Medians have been calculated from unpublished grouped data.

The total income concept in the 1986 Census included, for the first time, federal child tax credits. As in 1981, the 1986 Census did not collect income information from institutional residents. Income statistics for families and households are published for those in orivate households only.

Total and employment income size distributions by various characteristics for the population 15 years and over in Canada, provinces and territories are published in separate reports. Also published separately are the income size distributions of census families, non-family persons, economic families, unattached individuals and private households.

Census income statistics are subject to sampling variability. Although such sampling variability and bequite small for large population groups, its effects cannot be ignored in the case of very small subgroups of population in an area or in a particular category. This is because, all other things being equal, the larger the sample size, the smaller is the error. For this reason, income data for areas, where the non-institutional population was below 250, have been suppressed. However, where statistics are not suppressed but are still based on relatively small totals, the readers are strongly advised to exercise caution in the use and interpretation of these statistics.

INCOME STATUS AND INCIDENCE OF LOW INCOME

Income status refers to the position of economic families and unattached individuals in relation to Statistics Canada's low income cut-offs. These cut-offs are determined separately for families of different sizes and living in areas of different degrees of urbanization.

The incidence of low income is the proportion or percentage of units in a given classification below the income cut-offs. It should be noted that the incidence rates (percentage of families/unattached individuals below the income cut-offs) are the true rates in that these have been calculated from unrounded estimates of families and unattached individuals in private households.

The low income statistics from the 1986 Census are based on the revised (1978) cut-offs which were initially estimated from the 1978 National Family Expenditure Survey and then updated to 1985 the changes in the Consumer Price Index since 1978. The 1985 matrix of low income cut-offs is shown below.

For the purposes of low income statistics, economic families and unattached individuals in the Yukon and the Northwest Territories and on the Indian reserves are excluded. The low income cut-offs we based on certain expenditure-income patterns which were not available from survey data for the entire population.

The census and the Survey of Consumer Finances differ slightly when applying the "Size of Area" classification to derive incidence of low income. Census takes into account the density of population to designate an enumeration area as urban and the total population of contiguous urban EAs determines the size of area. The survey takes complete CMAs or CAs and classifies these into size of area by total population within the CMA/CA boundaries. The overall impact of this difference is needligible.

For further details on conceptual and coverage aspects, see the 1986 Census report Family Income, Economic Families, Catalogue No. 93-918. (See also Income Distributions by Size in Canada, 1985, Catalogue No. 13-207.)

NUMBER OF WEEKS WORKED

The data for the 40.48 and 49.52 weeks worked categories for 1985 must be interpreted with caution because some respondents tend to exclude their paid leave of absence due to vacation or for other reasons from their work weeks, when in fact such leave of absence should be included. As a result, the 49.52 week category may be understated.

LABOUR FORCE ACTIVITY

The census labour force activity concepts have not changed between 1981 and 1986. However, the processing of the data was modified causing some differences. In the 1986 Census, contrary to previous censuses, a question on school attendance was not asked. This question was used to edit the labour force activity variable, specifically unemployment. Consequently, the processing differences affect the unemployed population and are mostly concentrated among the 15-19-year age group. The table above indicates the magnitude of the effect upon the data, at the Canada level.

Table A: Low Income Cut-offs of Family Units, 1985

| | Size of area of residence | | | | | | |
|---------------------|---------------------------|----------------------|--------------------|------------------------|----------------|--|--|
| Size of family unit | 500,000 and over | 100,000 – 499,999 | 30,000 - 99,999 | Small urban regions | Rural areas | | |
| | 1985 dollars | | | | | | |
| 1 person | 10,233 | 9,719 | 9,117 | 8,429 | 7,568 | | |
| 2 persons | 13,501 | 12,815 | 11,956 | 11,093 | 9,891 | | |
| 3 persons | 18,061 | 17,115 | 15,996 | 14,880 | 13,244 | | |
| 4 persons | 20,812 | 19,779 | 18,490 | 17,200 | 15,310 | | |
| 5 persons | 24,252 | 22,963 | 21,415 | 19,952 | 17,803 | | |
| 6 persons | 26,488 | 25,026 | 23,393 | 21,758 | 19,436 | | |
| 7 persons or more | 29,155 | 27,606 | 25,801 | 23,994 | 21,415 | | |

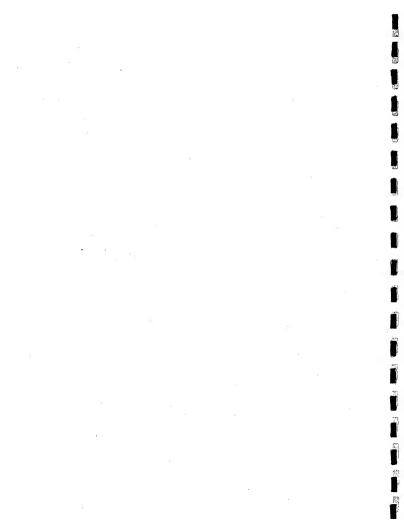

Labour Force Activity, 1981 Census of Canada

| Canada | 1981 Census (as published in 1981) | 1981 Census (using 1986 processing) | % change |
|--------------------------------|--|---|-------------|
| Labour force 15 years and over | 12,054,150 | 12.081.280 | .23 |
| Employed | 11,167,915 | 11,167,915 | no change |
| Unemployed | 886,235 | 913,365 | 3.06 |
| Not in the labour force | 6,555,135 | 6,528,005 | -0.41 |
| Labour force 15-19 years | 1,073,945 | 1.098,390 | 2.28 |
| Employed | 906,705 | 906,705 | no change |
| Unemployed | 167,240 | 191,680 | 14.61 |
| Not in the labour force | 1,229,630 | 1,205,190 | - 1.99 |
| Labour force 20 years and over | 10,980,205 | 10,982,890 | 0.02 |
| Employed | 10,261,210 | 10.261,210 | no change |
| Unemployed | 718,995 | 721,685 | 0.37 |
| Not in the labour force | 5,325,505 | 5,322,815 | - 0.05 |

APPENDIX I. Population and Occupied Private Dwellings, Showing Estimates for Incompletely Enumerated Indian Reserves and Indian Settlements, for Canada, Provinces and Territories, 1986

| Provinces and Territories, 1986 | | | | | | |
|---------------------------------|---|---|---|---|---|----------------------------|

ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems — CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information. For a brief description of the products and services available from the 1986 Census, consult the section on Guidelines for Using This Publication.

DOCUMENTS DE RÉFÉRENCE EN FRANÇAIS

DÉFINITIONS

Seul un résumé des définitions des termes géographiques et des concepts du recensement est présenté ici. Les utilisateurs doivent consulter le Dictionnaire du recensement de 1986 (n° 99-101F ou E au catalogue) pour les définitions complètes et les observations additionnelles pertinentes.

TERMES GÉOGRAPHIQUES:

AGGLOMÉRATION DE RECENSEMENT

Concept et critères généraux

Le concept général d'agglomération de recensement (AR) s'applique à un grand noyau urbanisé anisi qu'aux régions urbaines et rurales hautement intégrées à ce noyau du point de vue économique et social.

Une AR se définit comme la principale zone du marché du travali d'une région urbaine (le noyau urbanisé) d'au moins 10,000 habitants, d'après les chiffres de population du recensement précédent. Dès que la population du noyau urbanisé de l'AR atteint 10,000 habitants, toujours selon les chiffres du recensement précédent, celle-ci devient une région métrosolitaine de recensement (RMR).

Chaque AR comprend une ou plusieurs subdivisions de recensement (SDR) répondant à au moins un des critères suivants:

- la SDR est comprise entièrement ou en partie dans le noyau urbanisé;
- (2) au moins 50% de la population active occupée demeurant dans la SDR travaille dans le noyau urbanisé;
- au moins 25% de la population active occupée travaillant dans la SDR demeure dans le noyau urbanisé.

AR normales et unifiées

Dans certaines parties du pays, les AR voisines sont unies par des llens sociaux et économique. Dans ce cas, elles sont regroupées de manière à ne constituer qu'une seule AR unifiée. L'AR normale est, en revanche, indépendante. Ou bien elle n'est pas attenante à une autre AR, ou bien elle n'entretient pas suffisamment de liens avec une autre AR pour lui êter réune; lui êter évaire.

Pour justifier l'unification, il faut que le nombre total de personnes faisant la navette entre les AR adjacentes représente au moins 35% de la population active demeurant dans la plus petite AR. Une fois regroupées, les AR d'origine deviennent des sous-régions (appelées AR primaires) aus inde l'AR unifiée.

Autres critères et procédures déterminant l'inclusion d'une SDR dans une AR

En plus des critères (1), (2) et (3) énoncés ci-dessus, on applique les critères suivants pour déterminer si une SDR doit être incluse dans une AR:

- (4) Si le nombre de navetteurs est inférieur à 100, la SDR est exclue de l'AR, même si elle répond aux critères (2) ou (3).
- (5) Même si la SDR répond aux critères (2), (3) ou (4), la nécessité de maintenir la continuité de l'AR déterminera son inclusion ou son exclusion.
- (6) Même si elles ne satisfont plus aux critères (2) ou (3), les SDR des AR subdivisées en secteurs de recensement sont maintenues afin de permettre la comparabilité historique.

Tous les critères ci-dessus sont classés par ordre d'importance. Lorsqu'une SDR satisfait à certains d'entre eux relativement à plus d'une RMR/AR, on prend la région ou l'agglomération vis-à-vis de laquelle la SDR répond au critère le plus haut placé dans la liste et on y inclut cette dernière. Si les critères ont la méme importance, la décision est déterminée soit par la population réelle, soit par le nombre de naveteurs en cause.

Il se peut qu'on s'écarte des critères de délimitation dans certains cas spéciaux.

Les utilisateurs doivent savoir que les limites d'une AR ne coîncident pas nécessairement avec celles de la principale zone du marché du travail, les AR devant respecter les limites des SDR.

ÉTABLISSEMENT INDIEN

Lieu, désigné par le ministère des Affaires indiennes et du Nord Canada (ANNC) à des fins statistiques seulement, où un groupe indépendant d'au moins 10 autochtones habient de façon plus ou moins permanente. Les établissements indiens sont généralement situés sur des terres de la Couronne soumises à l'autorité fédérale ou à celle des administrations provinciales. Contrairement aux réserves indiennes, ces terres ne sont pas réservées à l'ausge exclusif d'une bande indienne.

PROVINCE

Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Quest.

RÉGION MÉTROPOLITAINE DE RECENSEMENT (RMR)

Concept et critères généraux

Le concept général de région métropolitaine de recensement (RMR) s'applique à un noyau urbanisé très important ainsi qu'aux régions urbaines et rurales hautement intégrées à ce noyau sur le plan économique et social.

Le terme RMR désigne la principale zone du marché du travail d'une région urbainse (noyau urbanisé) comptant 100,000 habitants ou plus, d'après les chiffres de population du recensement précédent. Lorsqu'une région devient une RMR, elle continue de faire partie du programme même si, ultérieurement, elle subit une baisse de population.

Quant aux zones des marchés du travail moins vastes des noyaux urbanisés comptant 10,000 habitants ou plus, elles font partie du programme des agglomérations de recensement (AR).

Chaque RMR est constituée d'une subdivision de recensement (SDR) ou plus répondant à au moins un des critères suivants:

- la SDR se trouve entièrement ou en partie dans le noyau urbanisé;
- (2) au moins 50% de la population active occupée demeurant dans la SDR travaille dans le noyau urbanisé;
- (3) au moins 25% de la population active occupée travaillant dans la SDR demeure dans le noyau urbanisé.

RMR normales et unifiées

Dans certaines parties du pays, les RMR et les AR voisines sont unies par des liens sociaux et économiques. Dans ce cas, elles sont regroupées de manière à constituer une seule RMR unifiée. Par contre, la RMR normale est indépendante. Ou bien elle n'est pas attenante à une autre RMR ou AR, ou bien elle ne possède pas de liens suffisants avec une autre RMR ou AR pour lui être réunie.

Pour justifier l'unification, il faut que le nombre total de personnes faisant la navette entre les RMR ou AR voisines représente au moins 35% de la population active demeurant dans la plus petit RMR ou AR. Une fois regroupées, les RMR et AR d'origine deviennent des sous-régions (nommées RMR et AR primaires) au sein de la RMR unifiée.

Autres critères et procédures déterminant l'inclusion des SDR dans les RMR

En plus des critères (1), (2) et (3) énoncés ci-dessus, on applique les critères suivants pour déterminer si une SDR peut être incluse dans la RMR:

- (4) Si le nombre de navetteurs est inférieur à 100, la SDR est exclue de la RMR, même si elle répond aux critères (2) ou (3).
- (5) Même si la SDR répond aux critères (2), (3) ou (4), la nécessité de maintenir la continuité de la RMR déterminera son inclusion ou son exclusion.
- (6) Les SDR des RMR subdivisées en secteurs de recensement sont maintenues même si elles ne satisfont plus aux critères (2) ou (3), et ce afin de permettre la comparabilité historique.

Tous les critères ci-dessus sont classés par ordre d'importance. Lorsqu'une SDR satisfait à certains d'entre eux relativement à plus d'une RME/AR, on prend la région ou l'agglomération vis-à-vis de laquelle la SDR répond au critère le plus haut placé dans la liste et on y inclut cette dernière. Si les critères ont la méme importance, la décision est déterminée soit par la population réelle, soit par le nombre de navetteurs en cause.

Il arrive à l'occasion que les critères de délimitation ne soient pas respectés dans certains cas spéciaux.

Les utilisateurs doivent savoir que les limites d'une RMR ne coincident pas nécessairement avec celles de la principale zone du marché du travail, les RMR devant respecter les limites des SDR. Il se peut également que les RMR ne soient pas exactement identiques aux régions mêtro-politaines établies par les autorités locales à des fins de planification ou autres.

RÉSERVE INDIENNE

Territoire dont le titre légal de propriété appartient à Sa Majesté la Reine, qui a été réservé à l'usage et au profit d'une bande indienne et qui est assujetti aux termes de la Loi sur les Indiens. Puisque les réserves indiennes échappent généralement à la compétence des autorités locales et sont administrées par le ministère des Affaires indiennes et du Nord Canada (AINC), elles sont considérées par Statistique Canada comme des subdivisions de recensement (SDR).

SUBDIVISION DE RECENSEMENT (SDR)

Terme générique qui désigne les municipalités, les réserves indiennes, les établissements indiens et les territoires non organisés.

À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalents des municipalités et délimitées par Statistique Canada en collaboration avec les provinces.

UNITÉ GÉOSTATISTIQUE

Toute région géographique délimitée ou utilisée pour la totalisation et la diffusion des données du recensement. L'expression englobe les provinces et territoires, les divisions de recensement, les subdivisions de recensement, les subdivisions de recensement, les régions métropolitaines de recensement, les régions métropolitaines de recensement primaires, les agglomérations de recensement primaires, les secteurs de recensement, les secteurs de recensement primaires, les output de l'expressions de recensement primaires, les secteurs de récensement provinciaux, les régions urbaines, les circonscriptions électorales fédérales et les secteurs de déompérement.

CONCEPT DU RECENSEMENT:

ACTIVITÉ

Activité sur le marché du travail des personnes en age de travailler qui, au cours de la semaine précédant le 3 juin 1988, faisaient partie de la population active occupée ou de la population active en chômage. Les autres personnes, en âge de travailler, qui n'étaient ni occupées ni en chômage sont classées dans la catégorie des injactifs. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des persionnaires d'institution.

ÅGE

Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1986). Cette variable est établie d'après la réponse à la question sur la date de naissance qui demande le jour, le mois et l'année de naissance. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

CATÉGORIE DE TRAVAILLEURS

(Également connu sous STATUT PROFESSIONNEL)

Variable permettant de classer les personnes qui ont déclaré un emploi selon (i) qu'elles ont surtout travaillé contre rémunération, à la commission ou contre rémunération en nature, (ii) qu'elles ont travaillé sans rémunération pour un parent du même ménage dans une entreprise ou une ferme familiale ou (iii) qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi déclaré. L'emploi déclaré désigne l'emploi qu'elles occupaient au cours de la semaine précédant le recensement ou, si elles n'ont pas travaillé au cours de cette semaine, leur emploi de plus longue durée depuis le 1er janvier 1985. Les personnes avant occupé deux emplois ou plus cette semaine-là devaient donner des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures.

Nota: Dans les publications des recensements de 1971 et de 1981, les travailleurs autonomes dans des entreprises constituées en société sont habituellement inclus dans la catégorie des travailleurs rémunérés pour que les données sur ces travailleurs puissent être comparées à celles d'enquêtes auprès des entreprises et au système de comptabilité nationale. Dans les publications du recensement de 1986, si l'espace le permet, les travailleurs autonomes dont la ferme ou l'entreprise est constituée en société sont montrés séparément.

CHÔMEURS(EUSES)

Personnes qui, pendant la semaine précédant le recensement:

- a) étaient sans travail, mais avaient cherché un emploi au cours des quatre semaines précédentes et étaient prêtes à travailler; ou
- avaient été mises à pied mais prévoyaient reprendre leur emploi; ou
- avaient pris des dispositions précises en vue de se présenter à un nouvel emploi dans les quatre semaines suivantes.

Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution

ERREUR TYPE DU REVENU MOYEN

Estimation de l'erreur type du revenu moyen. Il s'agit d'une estimation de l'erreur introduite dans les données du fait qu'elles sont recueillies soulement auprès d'un ménage sur cinq dans un échantillon aléatoire. Lorsqu'il se sert de ces chiffres, l'utilisateur peut être raisonnablement certain que, pour un groupe de personnes de 15 ans et plus (par ex., hommes de 45 à 54 ans), la valeur releile (la valeur que l'on aurait obtenue sans l'échantillonnage) équivaut à plus ou moins deux l'est peut équivaut à plus ou moins deux valeur équivaut à plus ou moins trois lois l'erreur type. Ce sestimations ne tiennent pas compte des effets de certains types d'erreurs de réponse, d'erreurs yevématiques ou d'erreurs de réponse, d'erreurs yevématiques ou d'erreurs de réponse,

ERREUR TYPE DU REVENU MOYEN D'EMPLOI

Estimation de l'erreur type du revenu moyen d'emploi. Il s'agit d'une estimation de l'erreur introduite dans les données du fait qu'elles sont recueillies seulement auprès d'un ménage sur cladans un échantillon aléatoire. Lorsqu'il se sert de ces chiffres, l'utilisateur peut être raisonnablement certain que, pour un groupe de personnes de 15 ans et plus (par ex., hommes de 45 à 54 ans), la valeur réelle (la valeur que l'on aurait obtenue sans l'échantillonnage) équivaut à plus ou moins deux fois l'erreur type, et presque certain que cette valeur équivaut à plus ou moins trois fois l'erreur type. Ces estimations ne tiennent pas compte des effets de certains types d'erreurs de réponse, d'erreurs ysétématiques ou d'erreurs de réponse, d'erreurs ysétématiques ou d'erreurs de réponse, d'erreurs ysétématiques ou d'erreurs de couverture.

ÉTAT MATRIMONIAL

Situation conjugale d'une personne.

Actuellement marié(e) (sauf séparé(e))

Personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union libre sont considérées comme actuellement mariées.

Séparé(e)

Personne qui a été abandonnée, ou qui est séparée de son conjoint, légalement ou non, parce qu'elle ne veut plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

Divorcé(e)

Personne qui a obtenu un divorce et qui ne s'est pas remariée.

Veuf(ve)

Personne dont le conjoint est décédé et qui ne s'est pas remariée.

Célibataire (jamais marié(e))

Personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé.

FAMILLE DE RECENSEMENT

Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur àge) ou un parent seul (peu importe son état matrimoniai) avec un ou plusieurs enfants jamais mariés (quel que soit leur àge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal: elles figurent donc comme une famille époux-épouse dans la plupart des tableaux sur la famille de recensement.

FAMILLE ÉCONOMIQUE

Groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance ou par adoption. Les personnes qui vivent en union libre sont considérées, aux fins ne du recensement, comme actuellement mariées, aux fins quel que soit leur état matrimonial legal; elles figurent donc comme des couples mariés dans les tableaux sur les familles économiques.

FORME JURIDIQUE

Statut juridique des entreprises commerciales ou agricoles. Cette variable intéresse les personnes qui travaillaient surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi déclaré, c'est-àdire l'emploi qu'elles avaient pendant la semaine précédant le recensement ou l'emploi qu'elles ont cocupé le plus longtemps depuis le 1st janvier 1985. Une <u>entreprise constituée en société</u> est une entité juridique constituée sous le régime des lois provinciales et fédérale. Une <u>entreprise ou ferme</u> non constituée en société ne possède pas sur le plan juridique une identité propre; il peut s'agir d'une société en nom collectif, d'une ferme exploitée en association, d'une entreprise familiale ou d'une entreprise coliètée propriétaire.

FRÉQUENCE DES UNITÉS À FAIBLE REVENU

(Voir "Notes spéciales".)

INACTIFS

Personnes qui, pendant la semaine précédant le recensement, ne voulaient pas un pe pouvaient pas travailler compte tenu des conditions existant sur le marché du travail. Sont incluses les personnes qui avaient cherché du travail au cours des quatre semaines précédentes mais qui n'étaient pas prêtes à travailler pandant la semaine de référence, de même que les personnes qui n'avaient pas travaille, n'avaient pas d'emploi auquel elles devaient se présenter au cours des quatre semaines suivant la semaine de référence et n'avaient pas été temporairement mises à pied ni n'avaient cherché et travail pendant cette période. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des ensoinnaires d'institution.

INDUSTRIE (SELON LA CLASSIFICATION DE 1980)

Nature générale de l'activité de l'établissement où travaille le recensé, déterminée par le nom c'employeur et par le genre d'entreprise, d'industrie ou de service. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Si le recense n'avait mas d'emploi au cours de la semaine précédant le recensement, il devait donner des renseignements sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 1985. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail.

Les données sur l'industrie sont groupées selon la Classification des activités économiques de 1980; il s'agit d'une classification à trois niveaux d'agrégation: 18 divisions (identifiées A à R) qui se subdivisent en 75 grands groupes et, par la suite, en 296 classes.

Il est possible de procéder à des comparaisons directes des données sur l'industrie tirées des recensements de 1971, 1981 et 1985, en se fondant sur la CAÉ de 1970. Pour plus de détails à ce sujet, voir la définition d'INDUSTRIE (selon la classification de 1970) dans le Dictionnaire du recensement de 1986, re 99-101F au catalogue.

LANGUE MATERNELLE

Première apprise dans l'enfance et encore comprise par le recensé au moment du recensement.

En 1986, les instructions ci-après étaient fournies aux recensés.

"Vour devez indiquer la première langue que vous avez apprise dans votre petite enfance, c'est-à-dire avant d'aller à l'école. Si vous ne la comprenez plus, indiquez la seconde langue que vous avez apprise. Si vous répondez pour une autre personne, indiquez la première langue qu'elle a apprise dans se petite enfance.

Si vous comprenez plusieurs langues, indiquez celle que vous avez apprise en premier lieu. Si vous en avez appris deux simultanément, indiquez celle que vous parliez vous-même le plus souvent à la maison. Si vous les utilisiez également, indiquez-les toutes les deux.

Dans le cas d'un enfant qui n'a pas encore appris à parler, indiquez la langue qu'il apprendra en premier lieu à la maison. S'il apprend simultament deux langues, indiquez celle dans laquelle on lui parle le plus souvent. Si les deux sont utilisées également, indiquez-les toutes les deux

Les personnes de langue indienne (de l'Inde) ne doivent pas indiquer indien mais plutôt hindi, ourdou, pendjabi ou une autre langue, selon le cas. Les personnes de langue amérindienne (indieníne) de l'Amérique du Nord) doivent indiquer le cri, l'ojibway ou une autre langue amérindienne, selon le cas."

LANGUE OFFICIELLE

Indique si le recensé peut soutenir une conversation en anglais ou en français, les langues officielles du Canada.

Il convient de souligner que les données provenant de la question sur les langues officielles portent sur l'auto-évaluation par les recensés de leur capacité de parler les deux langues officielles.

En 1986, les instructions ci-après étaient fournies aux recensés:

"N'indiquez pas l'anglais ou le français appris à l'école à moins de pouvoir soutenir une conversation assez longue sur divers sujets dans cette langue.

Dans le cas d'un enfant qui n'a pas encore appris à parler, indiquez la langue parlée le plus souvent à la maison s'il s'agit de l'anglais ou du français. Si l'une est aussi fréquement utilisée que l'autre, indiquez "L'anglais et le français". Cochez la case "Ni l'anglais tile français" quand ni l'une ni l'autre n'est fréquemment utilisée.

Si vous êtes muet(te), indiquez l'anglais, le français ou les deux dans la mesure où vous pouvez vous faire comprendre dans cette (ces) langue(s)."

LANGUE PARLÉE À LA MAISON

Langue que le recensé parlait à la maison au moment du recensement. Si le recensé parlait plus d'une langue, il devait indiquer la langue qu'il utilisait le plus fréquemment.

En 1986, les instructions ci-après étaient fournies aux recensés:

"Vous devez indiquer la langue que vous parlez vous-même le plus souvent à la maison. Si vous répondez pour une autre personne, indiquez la langue qu'elle parle le plus souvent.

Si vous parlez deux langues également, indiquez-les toutes les deux.

Dans le cas d'un enfant qui ne parle pas encore, indiquez la langue le plus souvent parlée à la maison. Si deux langues sont également utilisées, indiquez-les toutes les deux. Si vous êtes muet(te), indiquez la langue dont vous vous servez le plus souvent à la maison pour vous faire comprendre.

Si vous demeurez seul(e), indiquez la langue dans laquelle vous êtes le plus à l'aise. Les personnes d'origine indienne (de l'Inde) ne doivent pas indiquer indien mais plutôt hindi, ourdou, pendjabi ou une autre langue, selon le cas. Les personnes d'origine amérindienne (indien(ne) de l'Amérique du Nord) doivent indiquer le cri, l'ojibway ou une autre langue amérindienne, selon le cas."

MOBILITÉ

La mobilité est déterminée d'après la réponse à la question concernant le domicile habituel d'une personne le jour du recensement et son domicile habituel cinq ans plus tôt. Cette variable permet de classer la population en personnes rivant pas déménagé et personnes avant déménagé (mobilité. Les personnes avant déménagé peuvent également être classées comme non-migrants ou migrants (statut migratoire).

Les <u>personnes n'ayant pas déménagé</u> sont celles qui, le jour du recensement, demeuraient dans le même logement que celui qu'elles occupaient cinq ans plus tôt.

Les <u>personnes avant déménagé</u> sont celles qui, le jour du recensement, demeuraient dans un logement différent de celui qu'elles occupaient cinq ans plus tôt.

Les <u>non-migrants</u> sont des personnes ayant déménage qui, le jour du recensement, demeuraient dans la même subdivision de recensement (SDR) que celle où elles résidaient cinc ans plus 6t.

Les migrants sont des personnes ayant déménagé qui, le jour du recensement, résidaient toujours au Canada mais dans une subdivision de recensement différente de celle où elles résidaient cinq ans plus tot (migrants internes) ou encore ce sont les personnes qui résidaient à l'extérieur du Canada cinq ans plus tôt (migrants externes).

En ce qui concerne la <u>migration externe</u>, on a pris en compte les <u>immigrants</u>, c'est-à-dire les personnes qui vivaient à l'extérieur du Canada cinq ans avant le recensement, mais résidaient au Canada le jour du recensement. Par ailleurs, on n'a pas pris en compte les <u>émigrants</u>, c'est-à-dire les personnes qui résidaient au Canada cinq ans avant le recensement mais non le jour du recensement. La migration interprovinciale est l'ensemble des deplacements, d'une province ou d'un territoire vers un autre, accompagnés d'un changement de résidence. Le migrant interprovincial est l'individu qui effectue, au cours de la période intercensitaire, un tel déplacement. Cet individu est un émigrant interne pour sa province ou son territoire d'origine et un immigrant interne pour sa province ou son territoire de destination.

Les diplomates el les citoyens canadiens au sein des Forces armées à l'étranger ainsi que les pensionnaires d'institution sont exclus de l'univers auprès duquel les données sur la mobilité sont recueilles. Ils ne figurent donc pas dans les tableaux de données du recensement qui portent sur la mobilité. Les enfants àgés de 4 ans ou moins le 3 juin 1986 sont également exclus de tous les tableaux du recensement qui portent sur la mobilité en raison de la période de référence de cinq ans.

Il convient de souligner qu'antérieurement au recensement de 1981, les recensés devaient déclarer uniquement les antécédents ethniques ou culturels du côté paternel. Même si plusieurs origines ethniques avaient été déclarées, une seule était saisie; autrement dit, une seule origine ethnique était retenue pour chaque recensé. En 1981, cette restriction a été supprimée de facon à tenir compte des origines multiples. Dans le questionnaire de 1981, un espace était prévu pour une réponse en toutes lettres, en plus des cases de réponse. Dans le questionnaire de 1986, les recensés peuvent déclarer jusqu'à trois origines ethniques en plus de celles qui sont proposées dans les cases de réponse. Cela augmente le nombre de réponses multiples possibles.

Dans le questionnaire de 1986, la question est legérement différente de celle de 1981. En 1981, on demandait aux recensés: "À quel groupe ethnique ou culturel apparteniex-vous, vous ou so ancêtres, a votre première arrivée sur ce continent?" La précision "à votre première arrivée sur ce continent." Act eté supprimée dans le questionnaire de 1986. En 1986, la question a été reformulée comme suit: "À quel63 groupe(s) ethnique(s) ou culture(s) appartenez-vous ou vos ancêtres apoartenaient-il3"

PENSIONNAIRE D'INSTITUTION

Résident d'un logement collectif d'institution, autre qu'un membre du personnel et sa famille.

Les logements collectifs d'institution comprennent les orphelinats et foyers our enfants, les centres de soins spéciaux et établissements pour personnes agées et malades chroniques, les hópitaux, les hópitaux psychiatriques, les centres de traitement et établissements pour handicapés physiques, les établissements pénitentiaires et établissements de correction, les foyers pour jeunes contrevenants et les prisons.

PERSONNES OCCUPÉES

Personnes qui, au cours de la semaine précédant le 3 juin 1986 :

- a) avaient fait un travail quelconque, à l'exclusion des travaux ménagers, des travaux d'entretien ou des réparations effectués à la maison de même que le bénévolat; ou
- b) étaient temporairement absentes de leur travail ou de l'entreprise à cause d'un conflit de travail à leur lieu de travail, d'une maladie ou d'une incapacité temporaire, de vacances, ou encore pour d'autres raisons.

Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

POPULATION ACTIVE EXPÉRIMENTÉE

Variable obtenue en retranchant de la population active totale les chômeurs de 15 ans et plus qui n'ont jamais travaillé ou qui ont travaillé seulement avant le les janvier 1985.

POPULATION ACTIVE INEXPÉRIMENTÉE

Comprend les chômeurs de 15 ans et plus qui n'avaient jamais travaillé ou qui avaient travaillé seulement avant le 1^{er} janvier 1985.

POPULATION ACTIVE TOTALE (PENDANT LA SEMAINE DE RÉFÉRENCE)

Personnes qui étaient soit occupées, soit en chômage pendant la semaine précédant le recensement (le 3 juin 1986). Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

PROFESSION (SELON LA CLASSIFICA-TION DE 1980)

Genre de travail que faisaient les personnes pendant la période de référence. Le genre de travail exécuté est défini à partir du type d'emploi déclaré par le recensé et de la description des tâches les plus importantes qui s'y rattachent. Ces données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le recensement, les données portent sur l'emploi qu'il·elle a occupé le plus longtemps depuis le ler janvier 1985. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Aux fins du présent profile, les groupes de base des professions de la Classification type des professions (TCP) ont été regroupés en 13 groupes de professions par l'emploi et Immigration Canada.

Les données de 1981 et de 1986 sur la profession sont directement comparables. Dans le cas des données du reçensement de 1971, des ajustements préalables doivent être faits à l'univers et à la classification adoptés. Pour plus de renseignements à ce sujet, veuillez vous reporter à la définition de PROFESSION (selon la classification de 1971). Voir le Dictionnaire du recensement de 1986, n° 99-101 Fau catalogue.

REVENU D'EMPLOI

Revenu total reçu en 1985 par les personnes de 15 ans et plus sous forme de rémunération, de revenu net provenant d'un travail autonome non agricole et (ou) de revenu net agricole.

REVENU MÉDIAN DES PARTICULIERS

Valeur centrale séparant la répartition d'un groupe particulier, selon la taille du revenu, en deux parties égales, la première regroupant les unités ayant un revenu inférieur à la médiane, la seconde, les unités ayant un revenu supérieur à la médiane.

REVENU MOYEN D'EMPLOI

Revenu total moyen de l'emploi pondéré des personnes de 15 ans et pius qui ont déclaré un revenu d'emploi en 1985. Pour établir le revenu moyen d'emploi à partir de données non arrondies, on divise le revenu agrégé d'emploi d'un groupe de personnes (par ex., hommes de 45 à 54 ans) par le nombre de personnes dans ce groupe qui touchent un revenu d'emploi.

REVENU MOYEN DES PARTICULIERS

Revenu total moyen pondéré des personnes àgées de 15 ans et plus qui ont déclaré un revenu en 1985. Pour établir le revenu moyen à partir de données non arrondies, on divise le revenu agrégé du groupe correspondant (par exemple, les hommes de 45 à 54 ans) par le nombre de personnes qui ont déclaré un revenu dans ce groupe.

REVENU TOTAL

(Voir "Sources de revenu".)

SCOLARITÉ: PLUS HAUT NIVEAU ATTEINT

Dernière année d'études terminée ou non au niveau primaire et secondaire, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la sociarité, les études universitaires sont classées au-dessus de la catégorie "autressus de la catégorie "autressus qui a obtenu un grade; certificat ou diplôme se rouve classée à un échelon au-dessus de celle qui a un nombre d'années de scolarité plus élèvé, terminées ou non mais qui n'a pas de titre scolaire.

SCOLARITÉ: PRINCIPAL DOMAINE D'ÉTUDES (PDÉ)

Principale discipline ou principal domaine dans lequel le recensé a fait ses études ou recu sa formation et obtenu son plus haut grade, certificat ou diplôme postsecondaire. En ce qui a trait au principal domaine d'études, la classification adoptée comporte 10 grandes catégories: enseignement, loisirs et orientation; beaux-arts et arts appliqués: lettres, sciences humaines et disci-plines connexes; sciences sociales et disciplines connexes; commerce, gestion et administration des affaires; sciences et techniques agricoles et biologiques: génie et sciences appliquées; techniques et métiers du génie et des sciences appliquées; professions, sciences et technologies de la santé; mathématiques et sciences physiques. Les caté-gories sont elles-mêmes subdivisées en plus de 100 "souscatégories", elles-mêmes divisées en plus de 425 groupes de "base".

SEMAINES TRAVAILLÉES, À PLEIN TEMPS OU À TEMPS PARTIEL. EN 1985

Cette variable s'applique aux personnes qui ont travaillé en 1985. Ces dernières devaient préciser si elles avaient travaillé des semaines complètes ou non. Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi per partiel pendant l'autre partie devaient devaient répondre en fonction de l'emploi pour lequei elles avaient travaillé le plus grand nombre de semaines. Les données sont disponibles pour les semaines. Les données sont disponibles pour les 1985. à l'exclusion des pensionnaires d'institution.

SEXE

Qualité d'homme ou de femme.

SITUATION DES PARTICULIERS DANS LA FAMILLE ÉCONOMIQUE

Classement des personnes selon qu'elles font partie ou non d'une famille économique.

Membres d'une famille <u>économique</u> — Membres d'un ménage qui font partie d'une famille économique.

Personn<u>es seules</u> – Membres d'un ménage qui ne font pas partie d'une famille économique. Une personne vivant seule dans un logement est toujours classée comme une personne seule.

SOURCES DE REVENU

Toutes les personnes de 15 ans et plus devaient déclarer leur revenu total provenant des sources suivantes durant l'année civile 1985.

a) Salaires et traitements

Salaires et traitements bruts avant les penretenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris la solde et les indemnités militaires, les pourboires, les commissions, les gratifications et aussi les gains provenant de but genre d'emploi occasionnel réalisés durant l'année civile 1985. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou rutilisation d'un véhicule automobile, etc.

b) Revenu net provenant d'un travail autonome non agricole

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les saliaires, les loyers l'amortissement, etc.), provenant de l'exploitation d'une entreprise non agricole non constituée en société ou de l'exercice d'une profession pour son propre compte, durant l'année civile 1985. Dans le cas d'une asociation, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple, pour la vente et la livraison de produits de beauté ainsi que celui des activités autonomes des artistes, des écrivains, des professeurs de musique, des coffeurs (coffuers) (c

 Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de
l'exploitation d'une ferme, pour son propre
compte ou en association, durant l'année civile
1985. Dans le cas d'une association, le recensé
devait déclarer seulement sa propre part du
revenu. Sont inclus dans le revenu net les
subventions, les paiements supplémentaires ou
les avances aux agriculteurs accordés par les
administrations fédérale et provinciales. Par
contre, la valeur du revenu en nature, comme
les produits agricoles produits et consommés à
la ferme, n'est pas incluser.

 d) Pension de sécurité de la vieillesse et supplément de revenu garanti

Pensions de sécurité de la vieillesse et supplément de revenu granti versés, par l'administration fédérale seulement, aux personnes de 65 ans et plus et aux conjoints de 60 à 64 ans des bénéficiaires de prestations de sécurité de la vieillesse, durant l'année civile 1985. Sont incluses les allocations au conjoint versées au conjoint survivant des bénéficiaires de la pension de sécurité de la vieillesse.

 e) Prestations du Régime de pensions du Canada et du Régime de rentes du Québec

Prestations reçues au cours de l'année civile 1985 en vertu du Régime de pensions du Canada ou du Régime de retraite, les pensions de retraite, les prestations de survivant(e), les pensions d'invalidité. Sont exclues les pensions d'invalidité. Sont exclues les pensions de cratraite des fonctionnaires, des membres de la GRC et des militaires ainsi que les prestations de décès sous forme forfaitaire.

f) Allocations familiales

Sont comprises les allocations fédérales et provinciales versées au cours de l'année civile 1985 pour les enfants de moins de 18 ans. Bien que le montant de ces allocations n'ait pas été recueilli directement des recensés, il a été calculé et appliqué au revenu de l'un des parents.

g) Crédits d'impôt fédéral pour enfants

Sont compris les crédits d'impôt fédéral pour enfants versés au cours de l'année civile 1985 pour les enfants de moins de 18 ans. Bien que le montant de ces crédits n'ait pas été recueilli directement des recensés, il a été calculé et appliqué au revenu de l'un des parents.

h) Prestations d'assurance-chômage

Total des prestations d'assurance-chômage reçues au cours de l'année civile 1985, avant les déductions d'impôt. Sont incluses les prestations de maladie, de maternité, de pécheurs, de travail partagé, de recyclage et de retraite reçues en yertu du programme fédéral d'assurance-chômage.

i) Autre revenu provenant de sources publiques

Tous les transferts, à l'exclusion de ceux qui sont compris dans une source de revenu séparée (allocations familiales, crédits d'impôt pour enfants, pensions de sécurité de la vieillesse et suppléments de revenu garanti, prestations du Régime de pensions du Canada ou du Régime de rentes du Québec et les prestations d'assurance-chômage), reçus des administrations fédérale, provinciales et municipales durant l'année civile 1985. Cette source comprend les paiements versés aux personnes nécessiteuses comme les mères avant des enfants à charge, les personnes inaptes au travail de façon temporaire ou permanente, les personnes âgées, les aveugles et les invalides. Sont également inclus les suppléments de revenu accordés par les gouvernements provinciaux, c'est-à-dire les montants versés aux personnes âgées par l'administration provinciale qui s'ajoutent à la pension de sécurité de la vieillesse et au supplément de revenu garanti ainsi que les subventions aux personnes ågées l'administration provinciale pour compenser les frais de logement. Enfin, sont aussi inclus d'autres paiements de transfert, par exemple, les prestations du Programme national de

formation, les pensions aux anciens combattants, les allocations aux anciens combattants, les pensions aux veuves et auxpersonnes à charge des anciens combattants, les indemnisations des accidents du travail. Sont aussi inclus les crédits d'impôt et autre allocations des gouvernements provinciaux, conformément aux déclarations d'impôt.

j) Dividendes et intérêts d'obligations, de dépôts et de certificats d'épargne et autre revenu de placements

Intérêts perçus durant l'année civile 1985 au titre de dépòts dans des banques, des sociétés de fiducie, des coopératives, des caisses polulaires, etc., aixque les intérêts des certificats d'épargne, d'obligations agranties et non garanties de tous les dividendes de sources canadiennes et étrangères. Comprent également les autres terangères. Comprent également les autres revenus de placements provenant de sources canadiennes ou étrangères tels que les revenus nets provenant d'une propriété, les intérêts sur prêts et hypothèques, le revenu régulier provenant d'une succession ou d'un fonds de fiducie et les intérêts sur polices d'assurance.

k) Pensions de retraite et rentes

Tout revenu ordinaire recu durant l'année civile 1985 à la suite de cotisations à un régime de retraite couvrant un employé ou un groupe d'employés. Sont inclus les paiements recus de toutes les rentes, y compris les paiements reçus en vertu d'un régime enregistré d'épargneretraite (REÉR) venu à échéance reçus sous forme de rente viagère, de rente à échéance fixe, d'un fonds enregistré de revenu de retraite ou d'un contrat de rente à versements invariables, les pensions versées aux veuves ou à d'autres parents de pensionnés décédés, les pensions des fonctionnaires et des personnes des Forces armées ou d'officiers de la GRC à la retraite, les rentes du Fonds des rentes du gouvernement canadien, d'une compagnie d'assurance, etc. Sont exclus les prestations de décès sous forme forfaitaire, les prestations et les retraits globaux d'un régime de pension ou d'un REÉR ou les remboursements de cotisations payées en trop.

Autre revenu en espèces

Revenu ordinaire reçu durant l'année civile 1985 qui n'a pas été déclaré dans l'une des neuf autres sources indiquées sur le questionnaire, par exemple, pension alimentaire, soutien d'un enfant, soutien périodique reçu de personnes non membres du ménage, revenu net provenant de chambreurs et de pensionnaires, revenu reçu de l'étranger (sauf les dividendes et intérêts), bourses d'études non remboursables, indemnités de cessation d'emploi, redevances, indemnités de grève.

Recettes non comptées comme revenu

Ne sont pas compris les gains et pertes de jeu, les sommes forfaitaires heritées au cours de l'année, les gains et pertes de capital, le produit de la vente d'une propriété ou de biens personnels, les remboursements d'impôt sur le revenu, les prêts reçus, les emprunts remboursés à une personne comme le préteur, les réglements forfaitaires de polices d'assurance, les remises d'impôts fonciers et d'autres taxes, et les remboursements de cotisations des pensions ainsi que tout genre de revenu en nature comme le gite et le couvert gratuits, ou la nourriture et les produits agricoles récoltés et consommés sur la ferme.

Revenu total

Le revenu total est la somme des montants reçus en 1985 par un bénéficiaire à partir des sources de revenu énumérées ci-dessus.

TAUX D'ACTIVITÉ

Pourcentage de la population active totale (pendant la semaine de référence) par rapport à la population totale de 15 ans et plus, à l'exclusion des pensionnaires d'institution, dans un secteur, un groupe ou une catégorie

TAUX DE CHÔMAGE

Pourcentage de la population active en chômage par rapport à la population active totale (pendant la semaine de référence) dans un secteur, un groupe ou une catégorie. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

TRAVAIL EN 1985

Indique le nombre de semaines au cours desquelles les personnes ont travaillé, en 1985, à plein temps ou à temps partiel. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1986 ont été recueillies sur une base de 100% (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis auprès d'un échantillon de 20% et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence. (Veuillez remarquer que, dans les réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de toute la population. Dans les Territoires du Nord-Ouest, les données ont été recueillies auprès de toute la population mais, pour les collectivités de Fort Smith, Hay River, Pine Point et Yellowknife, seulement 20% des données ont été traitées.)

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut diffèrer de celui qui figure dans les bulletins de données intégrales. Cet écart (outre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

QUALITÉ DES DONNÉES

GÉNÉRALITÉS

Le recensement de 1986 a été un projet complexe de grande envergure. Même si l'on a déployé des efforts considérables pour maintenir des normes élevées tout au cours des activités de collecte et de traitement, les estimations obtenues sont inévitablement entachées d'erreurs. Les utilisateurs doivent savoir que ces erreurs existent et avoir une idée générale des principales composantes du recensement afin d'être en mesure de déterminer si les données du recensement peuvent leur être utiles et évaluer les risques que comporte le fait de baser leurs conclusions ou leurs décisions sur ces données

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, allant de la préparation des documents au traitement des données, en passant par l'établissement des listees des logements et la collecte des données. Certaines erreurs peuvent survenir plus ou moins au hasard et, lorsque les différentes réponses sont agrégées pour un groupe suffisamment grand, elles tendent à s'annuler. Dans le cas des erreurs de cette

nature, plus le groupe est grand, plus l'estimation correspondante est exacte. C'est pour cette raison que les utilisateurs sont invités à employer avec une certaine réserve les petites estimations. Par contre, d'autres erreurs peuvent se produire systématiquement et entraîner des estimations Philaisées?. Comme le biais découlant de ces erreurs est persistant, peu importe la taille du groupe pour lequel les réponses sont agrégées, et qu'il est particulièrement difficile à mesurer, les erreurs systématiques posent un plus grave problème à la plupart des utilisateurs des données que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreur sont les suivants:

- les erreurs d'observation, qui se produisent lorsqu'on oublie des logements ou des personnes, qu'on les englobe à tort ou qu'on les compte deux fois:
- les erreurs dues à la non-réponse, qui découlent du fait qu'on n'a pas pu obtenir de réponses d'un petit nombre de ménages et(ou) de personnes à cause d'une absence prolongée ou pour toute autre raison:
- les erreurs de réponse, qui surviennent lorsque le répondant, et parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse;
- les erreurs de traitement, qui peuvent se produire à diverses étapes, notamment: au codage, lorsque les commis transforment les réponses en toutes lettres en codes numériques; à la saisie des données, lorsque les préposés à l'introduction des données transfèrent sur les bandes pour ordinateur les réponses figurant sur le questionnaire du recensement; à l'imputation, lorsque l'ordinateur insère dans un enregistrement une réponse 'validé", mais pas nécessairement exacte, pour remplacer des données manquantes ou "invalides" (une réponse est "validé" si elle est conforme aux autres renseignements de l'enregistrement, elle est "invalidé" si elle est socnforme); si elle n'est pas conforme);
- les erreurs d'échantillonnage, qui s'appliquent uniquement aux questions supplémentaires figurant sur la formule complète et s'adressant à un échantillon d'un cinquième des ménages, elles résultent du fait que les réponses à ces questions, lorsqu'elles sont pondérées pour représenter l'ensemble de la population, diffèrent inevitablement des résultats qu'on aurait obtenus si on avait posé ces questions à tous les ménages.

Les types d'erreur ci-dessus ont chacun une composante aléatoire et une composante systématique. Toutefois, la composante systématique des rereurs d'échantillonnage est généralement très faible par rapport à la composante aléatoire. Par contre, dans le cas des erreurs non dues à l'échantillonnage, les deux composantes peuvent être importantes.

ERREURS D'OBSERVATION

Les erreurs d'observation peuvent influer sur la précision des chiffres du recensement, cés-à-dire la taille des divers univers du recensement: la population, les familles, les ménages et les logements. Bien qu'on ait pris quelques mesures pour corriger les erreurs identifiables, une certaine marge d'erreur subsiste toujours dans les chiffres définitifs du fait que des logements ou des personnes ont été oubliés, pris en compte par erreur dans le recensement ou comptés deux fois.

Si des logements ou des personnes n'ont pas été pris en compte alors qu'ils auraient dû l'être, on a un sous-dénombrement. Des logements peuvent être oubliés à la suite d'une mauvaise interprétation des limites des secteurs de dénombrement (SD) ou du fait que des logements sont cachés ou semblent inhabitables. Des personnes peuvent être oubliées quand le logement est oublié ou classé comme inoccupé, ou quand certains membres des ménages sont omis sur le questionnaire parce que le répondant a mal interprété les instructions concernant les personnes à inclure. Certaines personnes peuvent être oubliées parce qu'elles n'ont aucun lieu habituel de résidence et qu'elles ne se trouvaient dans aucun logement la nuit du recensement.

Les logements ou les personnes qui ont été pris en compte par erreur ou qui ont été comptés deux fois donnent lieu à un surdénombrement. surdénombrement des logements peut se produire lorsque des constructions ne convenant pas à l'habitation sont comptées comme des logements ou lorsque des unités qui ne correspondent pas à la définition d'un logement utilisée dans le recensement sont énumérées séparément au lieu d'être considérées comme faisant partie d'un grand logement. Le double compte des logements peut se produire, par exemple dans les cas où les limites des SD ne sont pas clairement définies. personnes peuvent être comptées deux fois parce que leur logement est compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. Parfois, une personne qui n'habite pas habituellement le Canada peut être comptée, à tort, dans le recensement. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement, les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

En 1986, on a entrepris quatre études pour mesurer les différents aspects des erreurs d'observation. Premièrement, on a revisité un échantillon des logements dénombrés comme inoccupés afin de vérifier s'ils étaient vraiment inoccupés le jour du recensement. On a rectifié les chiffres définitifs du recensement pour tenir compte des ménages oubliés parce que leur logement a été classé par erreur comme inoccupé. Deuxièmement, on a prélevé un échantillon des personnes dénombrées comme résidents temporaires pour vérifier si elles ont été dénombrées à leur lieu habituel de résidence. Au moyen de cet échantillon, on a pu estimer le nombre de personnes qui ont été oubliées parce qu'elles étaient temporairement absentes de leur lieu habituel de résidence. On a apporté les corrections correspondantes aux chiffres de population définitifs. Malgré ces corrections. les chiffres définitifs sont encore sujets à un certain sous-dénombrement. Pour l'ensemble du Canada et pour chaque province, on mesure l'ampleur de ce sous-dénombrement résiduel dans le recensement de 1986 au moyen d'une étude spéciale: la Contrevérification des dossiers. Le sous-dénombrement est généralement plus élevé pour certains groupes de la population, tels que les jeunes hommes adultes et les récents immigrants. Le sousdénombrement est compensé dans une certaine mesure par les erreurs de surdénombrement; en 1986, pour la première fois une étude spéciale est maintenant en cours, pour déterminer les erreurs de surdénombrement.

AUTRES ERREURS NON DUES À L'ÉCHANTILLONNAGE

Les erreurs d'observation font varier le nombre d'unités dans les divers univers du recensement, tandis que d'autres genres d'erreur font varier les caractéristiques de ces unités.

Il est parfois impossible d'obtenir d'un ménage une réponse complète, même si le logement a été jugé occupé et un questionnaire a été livré. Les membres du ménage ont pu s'absenter pendant toute la période du recensement ou, dans de rares cas, le chef de ménage a pu refuser de remplir le questionnaire. Il arrive plus souvent que le questionnaire est retourné, mais que les données fournies à certaines questions ou pour certaines personnes sont incomplètes. Nous déployons des efforts considérables pour obtenir la réponse la plus

complète possible. Les recenseurs vérifient les questionnaires et effectuent des suivis s'il manque des données. Le travail des recenseurs est ensuite vérifié par un surveillant et un technicien du contrôle qualitatif. Malgré ces mesures, à la fin de la phase de collect des données, il manque un petit nombre de réponses. Bien que les entrées manquantes soient éliminées pendant le traitement des données, il peut toujours se glisser quelques grreurs dues à la non-réponse, Ce genre d'erreur est particulièrement grave si les non-répondants sont différents des répondants à certains égards puisque, comme on le décrit dans un paragraphe ultérieur, la valeur manquante est remplacée par une valeur correspondante tirée d'un dossier "similaire". Si certaines caractéristiques des non-répondants diffèrent de celles des répondants, cette méthode entraine un bigis d'à la non-réponse.

Même lorsqu'on obtient une réponse, il se peut qu'elle ne soit pas tout à fait précise. Le répondant peut avoir mal interprété la question ou avoir donné une réponse incertaine, surtout s'il a répondu pour un autre membre du ménage qui tétait peut-être absent. Ces erreurs sont appelées erreurs de réponse. Bien que les erreurs de réponses soient en général atribuables à des reneurs que peuvent parfois étre liées à des erreurs qu'a faites peuvent parfois être liées à des erreurs qu'a faites le recenseur au moment oû il a rempli certaines sections du questionnaire, comme le type de construction résidentielle, ou lorsqu'il a rappelé le crépondant pour obtenir des données manquantes.

À certaines questions du recensement, il faut inscrire une réponse en toutes lettres. Pendant dépouillement au bureau régional, on attribue un code numérique à ces réponses "écrites". Il pas autre dans se produire des <u>erreurs de codage</u>, surtout lorsque la liste des codes est longue (comme dans le cas de la langue, de l'origine ethnique, de l'industrie et de la profession) ou lorsque la réponse écrite est ambigué, incomplète ou difficile à lire. En vérifiant un échantillo du travail de chaque préposé au codage et en prenant des mesures correctives s'il y a lieu, on peut contrôler les erreurs de codage, sans toutefois les éliminer complètement.

Après le codage et certaines autres étapes du dépouillement manuel des données, les renseignements figurant sur les questionnaires sont introduits sur clavier dans un fichier d'ordinateur. Deux procédures servent à contrôle le nombre d'erreurs à la saise des données. Premièrement, certaines vérifications (comme le contrôle des tranches) sont effectuées au moment de l'introduction des données. Deuxièmement, un de hantillo de chaque lot de documents est

réintroduit et comparé à la série de données originale. Si le nombre d'erreurs dans la série originale est supérieur à un nombre déterminé, tout le lot doit être réintroduit.

Une fois que les données sont saisies, elles sont envoyées à Ottawa, où elles font l'objet d'une série de contrôles informatiques permettant de découvrir des réponses manquantes ou incohé-rentes. Dans le cas des réponses incohérentes, il faut d'abord décider quelle réponse doit être considérée non valide. Les réponses non valides ou manquantes doivent ensuite être remplacées par de bonnes réponses, c'est-à-dire par des réponses compatibles avec les autres données figurant sur l'enregistrement. Dans une faible proportion de cas, la bonne réponse peut être déduite à partir des autres données de l'enregistrement. Toutefois, dans la plupart des cas, cela est impossible, et la bonne réponse est tirée d'un enregistrement "donneur" choisi au hasard parmi un groupe d'enregistrements cohérents où un certain nombre de caractéristiques connexes sont similaires à celles de l'enregistrement incomplet. On ne peut bien sûr garantir que la valeur imputée sera nécessairement la bonne réponse pour la personne concernée. Néanmoins, si les enregistrements contenant des données non valides ou manquantes sont, en moyenne, similaires aux enregistrements valides, les erreurs à l'imputation sont plus ou moins éliminées lorsque les résultats sont totalisés pour une région géographique ou un sous-groupe de la population suffisamment important.

On mène actuellement diverses études pour évaluer la qualité des réponses obtenues dans le cadre du recensement de 1986. Pour chaque question, on a calculé des taux de réponse et des taux de rejet à la vérification. Ces taux peuvent servir à déterminer la présence possible d'erreurs dues à la non-réponse et d'autres erreurs. De plus, les totalisations du recensement de 1986 ont été, ou seront, comparées à des estimations correspondantes établies à partir de recensements antérieurs, d'enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les extraits de naissances et les rapports d'évaluation municipale). comparaisons peuvent indiquer certains problèmes potentiels au niveau de la qualité ou du moins certaines incohérences entre les sources d'information.

En plus de ces comparaisons globales, on étudie actuellement les données de certains particuliers en comparant les réponses du recensement à une autre source de renseignements. Pour certaines caractéristiques "stables" (comme l'âge, le sexe, la langue maternelle, le lieu de naissance, etc.), les

réponses obtenues au recensement de 1986 sont comparées aux renseignements fournis pour les mêmes personnes au recensement de 1981. De plus, après le recensement de 1981. De plus, après le recensement de 1986, on a dénombré une seconde fois un échantillon de répondants, surtout pour déterminer les taux de surdénombrement. En même temps, les interviewers ont posé une série de questions détaillées sur la langue, lorigine ethnique et le type de construction résidentielle, et les réponses seront comparées aux réponses fournies au recensement, ce qui nous permettra de déterminer les erreurs de réponse et, nous l'espérons, de les comprendre.

ERREURS D'ÉCHANTILLONNAGE

Les estimations qui sont obtenues par la pondération des réponses recueillies auprès d'un échantillon sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

L'erreur possible due à l'échantillonnage est généralement exprimée en termes d'erreur type". Ceci est la racine carrée de la moyenne, tirée de tous les échantillons possibles de même taille et du même plan, de l'écart quadratique de l'estimation de l'échantillonnage à la valeur pour la population totale.

Le tableau à la page suivante présente une évaluation approximative de l'erreur type provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

Les utilisateurs qui désirent connaitre l'erreur approximative provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon de 20%, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type, l'utilisateur peut en genéral être raisonnablement certain que la valeur réelle de la population certain que la valeur réelle de la population

recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple, pour une case dont la valeur est 1,000, l'écart s'étendra de 1,000 + ou - 3X85 ou 1,000 + ou -195).

Les erreurs types données dans le tableau à la page suivante ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération ci-dessus). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant la publication correspondante qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisés au recensement de 1986 varieront cependant d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau à la page suivante pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage.

Pour de plus amples renseignements sur la qualité des données du recensement, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada KIA 07f6 (613) 951-6920.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publisé dans le présent rapport ont subi un "arrondissement aléatoire" qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatorie (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, par

soustraction ou par méthode résiduelle, sans ajouter d'erreur significative aux données du recensement. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations du recensement présentent quelques légères différences. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément à 100. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies.

La distorsion importante pouvant résulter de l'arrondissement aléatoire lorsqu'il s'agit de cases de faible valeur préoccupe certains utilisateurs. Cette distorsion, qui assure la protection contre la divulgation, entraîne une perte de précision des cases de données renfermant des chiffres peu élevés. Cependant, comme il s'agit d'une méthode aléatoire, les erreurs dues à l'arrondissement ont tendance à disparaître lorsque les cases de données sont agrégées de nouveau. Il est aussi possible de réduire les distorsions en intégrant des totaux partiels dans les totalisations. On peut aussi choisir de demander des totalisations spéciales établies à partir des bases de microdonnées du recensement. Dans le cas de produits person-nalisés, l'arrondissement aléatoire se fait après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté d'autres techniques, telles que la suppression des régions et des cases, afin d'assurer encore mieux la confidentialité des réponses.

Dans le cadre de la suppression des régions, toutes les données caractéristiques se rapportant à la région géographique sont supprimées et remplacées par le symbole (XXX). La suppression des données se fait différemment selon qu'il s'agit

Tableau: Erreur type approximative provenant de l'échantillonnage des données-échantillon du recensement de 1986

| | _ | | | | | Valeur | des case | s | | | | |
|--------------------------------------|----|-----|-----|-----|-------|--------|----------|--------|--------|--------|---------|---------|
| Erreur type approxi- mative | 50 | 100 | 200 | 500 | 1,000 | 2,000 | 5,000 | 10,000 | 20,000 | 50,000 | 100,000 | 500,000 |
| | 15 | 20 | 30 | 45 | 65 | 90 | 140 | 200 | 280 | 435 | 600 | 1,300 |

d'une région normalisée, c.-à-d. regroupant des secteurs de dénombrement (une circonscription électorale fédérale, une division de recensement. une subdivision de recensement, un secteur de recensement, etc.) ou d'une région non normalisée pour laquelle l'utilisateur désire une totalisation spéciale. Les données sont supprimées si la population est inférieure à 40 personnes dans le cas des régions normalisées, et à 100 personnes lorsqu'il s'agit de régions non normalisées. Pour les tableaux renfermant des répartitions des revenus. on supprime aussi les données relatives aux régions dont la population est inférieure à 250 personnes. Toutefois, les données supprimées sont incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Cette technique est appliquée à tous les produits renfermant des données infraprovinciales (c.-à-d. la série des Profils, les produits sommaires de base, les produits personnalisés et semi-personnalisés), qu'il s'agisse de données intégrales ou de données recueillies sur un échantillon de 20%

Nota: Pour les données-échantillon, la suppression des régions est fondée sur la population hors institution plutôt que sur la population totale, étant donné qu'aucune donnée-échantillon n'a été recueillie pour la population des institutions.

Dans le cas de la suppression des cases, il faut préciser une valeur minimale acceptable. Toutes les cases dont la valeur est inférieure au seuil établi sont supprimées et remplacées par le symbole (XXX). Les données supprimées sont toutefois incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Pour les données de 1986, on a mis en oeuvre deux méthodes différentes de suppression des cases. Dans le cas des publications de la série "Le Pays" et de la série "Dimensions" portant sur le revenu, la profession précise ou l'industrie précise, on supprime la répartition lorsqu'il s'agit de moins de 250 personnes ou unités. Dans le cas de totalisations personnalisées ou semi-personnalisées se rapportant à des variables recueillies à partir d'un échantillon, toutes les cases dont la valeur est de "5" (après arrondissement aléatoire) sont supprimées.

NOTES SPÉCIALES

AJUSTEMENTS AUX UNITÉS GÉOSTATISTIQUES

Les utilisateurs doivent être conscients du fait que les unités géostatistiques du recensement peuvent varier d'un recensement à l'autre. Par conséquent, celui qui utilise des données provenant de deux ou plusieurs recensement doit être au courant et tenir compte du fait que les limites géographiques des secteurs qu'il compare peuvent avoir été modifiées. Les utilisateurs qui désirent obtenir d'autres renseignements à ce sujet doivent se réfèrer aux documents déjà mentionnés sous la rubrique Produits de référence "ou "surlesser aux Services d'information de la géographie, Statistique Canada.

DATE DE RÉFÉRENCE DES RÉGIONS GÉOGRAPHIQUES

Toutes les données déclarées pour les subdivisions de recensement son fondées sur les limites qui existaient au ler janvier 1986, à condition que Statistique Canada ait en main les renseignements tatistique Canada ait en main les renseignements 1986 au plus tard. Dans les cas où les renseignements n'ont pas été reçus ou ont été reçus après le ler mars 1986, lome, le statut et (où les limites des subdivisions de recensement risquent de ne pas correspondre à ceux reconnus par les autorités provinciales.

CHIFFRES DE POPULATION BASÉS SUR LA RÉSIDENCE HABITUELLE

Les chiffres de population présentés ici pour les différentes régions géographiques indiquent le nombre de Canadiens qui y ont leur lieu habituel de résidence, sans égard au lieu où ils se trouvaient le jour du recensement. Sont également comptés les pour du recensement de la région en cause le jour du recensement et n'ayant pas de lieu habituel de résidence ailleurs au Canada. Dans la plupart des régions, il n'y a guère de différence entre le nombre de résidenc saileurs au région le jour du recensement. Toutefois, dans certains endroits, comme les lieux de villégrature et les régions où sont situés des camps de chantier importants, la différence entre ces deux chiffres peut être importants, la différence entre ces deux chiffres peut être importants.

RÉSERVES INDIENNES ET ÉTABLISSE-MENTS INDIENS PARTIELLEMENT DÉNOMBRÉS

Lors du recensement de 1986, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a dû être interrompu parce qu'on ne pouvait le mener à terme.

Les données de 1986 ne sont donc pas disponibles pour les réserves indiennes et les établissements indiens partiellement dénombrés et ne sont pas comprises dans les totalisations. Les données sur les régions géographiques ayant une ou plusieurs de ces réserves ou établissements font donc l'objet d'un renvoi approprié. En raison des données manquantes, les utilisateurs doivent prendre note que les comparaisons (par ex., des variations en pourcentage) entre 1981 et 1986 ne sont pas exactes pour les régions géographiques en cause. L'effet des données manquantes est très faible pour les régions géographiques de niveau plus élevé (Canada, provinces, régions métropolitaines de recensement et agglomérations de recensement) mais peut être plus important pour les petites régions où les réserves et établissements indiens en cause représentent une proportion plus grande de la

Bien qu'il soit impossible d'estimer la population de chaque réserve partiellement dénombrée, les estimations de la population totale manquante et du nombre total de logements privés occupés au niveau provincial ont été faites et sont présentées à l'annexe l.

Veuillez noter par contre qu'il a été impossible d'estimer les caractéristiques de la population manquante, même au niveau provincial.

Pour de plus amples renseignements sur ce sujet, reportez-vous au Bulletin d'information à l'intention des utilisateurs, numéro 1, "Sommaire de la méthode utilisée pour l'estimation de la population et du nombre de logements privés occupés dans les réserves indiennes où le dénombrement a été incomplet".

Une liste des réserves indiennes et des établissements indiens partiellement dénombrés figure à l'annexe 2. On a indiqué pour chacune la province, la division de recensement et, le cas échéant, la région métropolitaine de recensement ou l'agglomération de recensement (RMR/AR).

MOBILITÉ

population.

Les limites des régions géographiques sont celles au 1er janvier 1986, qui est la date de référence géographique du recensement du Canada de 1986.

Les chiffres pour le total des "migrants" (un migrant est une personne qui, cinq ans plus tôt, n'avait pas son lieu habituel de résidence à l'intérieur de la SDR où il a été dénombré) sont additifs au niveau géographique, c'est-à-dire que le nombre de migrants au niveau du Canada est la somme du nombre de migrants au niveau du Canada est la somme du nombre de migrants au niveau provincial, etc.

COMPARABILITÉ ET QUALITÉ DES DONNÉES SUR LA LANGUE

Comparaison entre 1981 et 1986

Langue maternelle et langue parlée à la maison. Les mêmes questions linguistiques on tété posées lors des deux derniers recensements mais pour celles sur la langue maternelle et la langue parlée à la maison, les instructions données aux répondants ont été modifiées. En 1981, les répondants étaient invités à n'indiquer qu'une langue maternelle et qu'une langue parlée à la maison. Malgré cela, 597,980 personnes (2.5% de la population) avaient déclaré plus d'une langue maternelle et 535,735 personnes (2.2% de la population) avaient déclaré plus d'une langue parlée à la maison.

Afin de mieux rendre compte de la réalité linguistique au Canada, ces instructions ont été supprimées du recensement de 1986. En vertu des nouvelles instructions données aux répondants, une personne pouvait indiquer deux langues maternelles si elle les avait apprises simultanément et les avait parlées aussi souvent l'une que l'autre dans son enfance. De même, une personne pouvait indiquer plus d'une langue parlée à la maison si elle les utilisait actuellement aussi souvent l'une que l'autre à la maison.

Le nombre de réponses multiples s'est accru de manière importante lors du recensement de 1986 par rapport à celui de 1981. En 1986, 954,940 personnes (3.8% de la population) ent fourni une réponse multiple à la question sur la langue maternelle et 1,159,875 personnes (4.6% de la population) ent indiqué parler plus d'une langue à la maison.

Cette augmentation résulte soit des modifications apportées au questionnaire, soit des changements dans la manière dont la population répond aux questions linguistiques, soit d'un accroissement du nombre de personnes ayant appris plus d'une langue maternelle ou du nombre de personnes parlant plus d'une langue à la maison. L'augmentation des réponses multiples peut aussi résulter d'une combinaison de ces facteurs.

Lors du traitement des données de 1981, on n'a retenu et publié qu'une seule langue, même dans les cas où plusieurs avaient été déclarées. En 1986, on a accepté les réponses comprenant plus d'une langue.

Pour faciliter l'établissement des tendances entre les deux recensements, les données du recensement de 1986 ont été ajustées. Dans les cas où plus d'une

lviv

langue a été indiquée, les réponses multiples ont été réparties entre les langues composantes dans les mêmes proportions qu'au recensement de 1981. Les résultats ont été publiés dans un document spécial intitulé "Données linguistiques ajustées", avril (1988). De plus, les données du recensement de 1981 ont été ajustées pour faire état des réponses multiples alors obtenues. Les données pour les régions métropolitaines de recensement sont présentées dans le tableau 3 (langue maternelle) et le tableau 8 (langue parlée à la maison) de la présente publication. Ces ajustements aux chiffres de la langue maternelle et de la langue parlée à la maison facilitent la mise en relation des données de 1986 avec celles de 1981, mais ne rendent pas parfaitement comparables les résultats des deux recensements. Par conséquent, il faut être très prudents dans l'interprétation des changements observés entre 1981 et 1986.

Des modifications ont été apportées à la classification des langues de 1985 par rapport à celles de 1981, notamment en ce qui concerne les langues autochtones. L'annexe B du Dictionnaire du recensement de 1986 (n° 99-101F au catalogue) nous donne une description des changements.

Langue officielle – Certains répondants ont déclaré parler l'anglais ou le français ou les deux à la maison alors qu'ils ont indiqué, à la question sur la langue officielle, ne pas pouvoir soutenir une conversation dans ces langues.

Dans de tels cas, au recensement de 1981, la réponse à la question sur la langue officielle était considérée comme étant erronée. Par conséquent, au cours du traitement des données, cette réponse était modifiée afin de montrer que la personne pouvait parler la (les) langue(s) officielle(s) qu'elle avait déclarée(s) à la question sur la langue parlée à la maison.

Au recensement de 1986, ces réponses n'ont pas oujours été considérées comme étant erronées. Si le répondant avait indiqué pouvoir parler une seule des langues officielles, soit l'anglais ou le français, et que cette langue correspondait à la langue maternelle de cette personne, aucune correction n'a été apportée lors du traitement. Par conséquent, ces enchaînements de réponses apparaissent tels quels dans les totalisations de 1986.

Langues autochtones. Les utilisateurs sont priés de noter que les données pour certaines réserves et établissements indiens ne sont pas disponibles (voir la note spéciale "Réserves indiennes et établissements indiens partiellement dénombrés"). Parmi la population qui a participé au recensement de

1986, 138,000 personnes ont déclaré une seule langue maternelle autochtone et 97,000 personnes ont déclaré parler une seule langue autochtone à la maison. Les personnes qui ont déclaré "Indien" comme langue sont comptées dans la catégorie "Langues amérindiennes, non incluses ailleurs (n.i.a.)". Cette catégorie comprend 8,000 personnes pour la langue maternelle et 5,500 personnes pour la langue parlée à la maison. Elle est également comprise dans le total des langues autochtones. Les utilisateurs sont priés de noter que pour la langue maternelle, environ le quart des 8,000 réponses classées dans cette catégorie, pour le Canada, ont été fournies par des personnes d'origine asiatique. Dans les provinces de l'Atlantique et en Colombie-Britannique, la proportion est à peu près la même que pour l'ensemble du pays. Au Manitoba, en Saskatchewan et dans les territoires, elle est de moins de 5%. Au Québec et en Alberta, elle est supérieure à celle du Canada, soit à peu près 40% et 45%. En Ontario, environ 2 répondants sur 3 dans cette catégorie étaient d'origine asiatique. Pour la langue parlée à la maison, la proportion de personnes d'origine asiatique est plus importante: environ 50% des 5,500 répondants pour le Canada. La proportion est également d'environ 50% au Québec. Approximativement 2 répondants sur 3 étaient d'origine asiatique en Colombie-Britannique et 4 sur 5 en Alberta et en Ontario. Comme pour la langue maternelle, la proportion est inférieure à 5% au Manitoba. Dans les autres provinces et territoires, très peu de gens ont indiqué "Indien" comme langue parlée à la maison.

Pour de plus amples renseignements au sujet des données linguistiques, veuillez communiquer avec la Division des statistiques sociales, du logement et des familles, Statistique Canada, Ottawa, Canada K1A OTG.

DONNÉES SUR LE REVENU

Les revenus moyen et médian de même que l'erreur type du revenu moyen de la population de 15 ans et plus sont calculés seulement pour les personnes ayant un revenu, mais également pour toutes les familles de recensement et les ménages privés qu'ils aient ou non déclaré un revenu. Le revenu agrège calculé à partir de ces données doit être utilisé avec prudence puisque les moyennes onté calculées avant l'arrondissement. Les médianes ont été calculées à partir d'un groupe de données non publiées. Le concept du revenu total au recensement de 1986 comprend, pour la première fois, les crédits d'impôt fédéral pour enfants. Le recensement de 1986, comme en 1981, n° pas recueilli de données sur le revenu des pensionnaires d'institution. Les statistiques sur le revenu des familles et des ménages sont publiées seufennent pour les personnes vivant dans des ménages privés.

Les répartitions des tranches du revenu total et du revenu d'emploi selon certaines caractéristiques pour la population de 15 ans et plus, pour le Canada, les provinces et les territoires, sour bubliées dans d'autres bulletins. Les répartitions des tranches de revenu pour les familles de recensement, les personnes hors famille, les familles économiques, les personnes seules et les ménages privés sont également publiées séparément.

Les statistiques du recensement sur le revenu sont sujettes à la variabilité d'échantillonnage. Bien qu'une telle variabilité d'échantillonnage puisse être assez petite pour de grands groupes de population, ses effets ne peuvent être ignorés dans le cas de très petits sous-groupes de population dans une région ou dans une certaine catégorie. Il en est ainsi parce que, toutes choses étant égales par ailleurs, plus grande est la taille de l'échantillon, plus petite est l'erreur. C'est pour cette raison que les données sur le revenu dans les régions où la population non institutionnelle était de moins de 250 habitants ont été supprimées. Par contre, là où les statistiques ne sont pas supprimées mais sont néanmoins fondées sur des totaux relativement petits, nous conseillons fortement aux lecteurs d'être prudents dans l'utilisation et l'interprétation de ces statistiques.

CATÉGORIE DE REVENU ET FRÉQUENCE DES UNITÉS À FAIBLE REVENU

La catégorie de revenu se rapporte à la situation des familles économiques et des personnes seules selon les seuils de faible revenu établis par Statistique Canada. Ces seuils sont déterminés séparément pour les familles de taille différente et celles vivant dans des secteurs ayant des niveaux d'urbanisation différents.

La fréquence des unités à faible revenu est la proportion ou le pourcentage des unités d'une classification donnée qui se situent en deçà des seuils de faible revenu. Il convient de noter que les taux de fréquence (pourcentage de familles/ personnes seules en deçà des seuils de faible revenul constituent les seuls taux reles puisqu'ils ont été calculés à partir d'estimations non arrondies des familles et des personnes seules dans les ménages privés.

Les statistiques sur le faible revenu, d'après le recensement de 1986, sont fondées sur les seuils de faible revenu révisés (1978) qui ont d'abord été estimés à la lumière de l'enquête nationale de 193 ur les dépenses des familles, puis mis à jour en 1985 en fonction de la variation de l'indice des prix à la consommation depuis 1978. La matrice des seuils de faible revenu de 1985 est indiquée au bas de la page.

Aux fins des statistiques sur le faible revenu, les familles économiques et les personnes seules frésidant au Yukon, dans les Territoires du Nord-Ouest et dans les réserves indiennes ne sont pas sen prises en compte. Les seuils de faible revenu s'inspiraient de certaines tendances "dépenses-revenu" que les données d'enquête ne fournissaient pas pour la population entière.

Pour déduire la fréquence des unités à faible revenu, on utilse le crière 'taille de la région''. lequel diffère selon qu'il s'agit du recensement ou de l'enquête sur les finances des consommateurs. Pour le recensement, la taille de la région est en effêt déterminée par la population totale des secteurs de dénombrement urbains contigus (un secteur de dénombrement est considéré comme urbain en fonction de la densité de la population).

Pour l'enquête sur les finances des consommateurs, on prend des RMR ou des AR et on détermine la taille de la région selon la population totale comprise dans les limites de ces RMR ou AR. Les répercussions globales de cette différence sont négligeables.

Pour plus de détails concernant les aspects conceptuels et le champ d'observation, voir la publication Revenu de la famille, familles économiques, n° 33-918 au catalogue. Voir également la publication Répartition du revenu selon la taille du Canada, 1985, n° 13-207 au catalogue.

NOMBRE DE SEMAINES TRAVAILLÉES

Les données concernant le nombre de semaines travaillées en 1985 doivent être utilisées avec circonspection pour les catégories 40-48 semaines et 49-52 semaines, car certains répondants ont tendance à ne pas inclure leurs congés payés de vacances ou pour autres raisons dans leurs semaines de travail, tel que requis. Ainsi, la catégorie 49 a 52 semaines peut être sous-estimée.

Tableau A: Seuils de faible revenu des unités familiales, 1985

| | Taille du secteur de résidence | | | | | | |
|--------------------------------|--------------------------------|----------------------|--------------------------------|-----------------------------|--------------------|--|--|
| Taille de l'unité familiale | 500,000 et plus | 100,000 - 499,999 | 30,000 - 99,9 99 | Petites régions urbaines | Régions rurales | | |
| d | ollars de 1985 | | | | | | |
| 1 personne | 10,233 | 9,719 | 9,117 | 8,429 | 7,568 | | |
| 2 personnes | 13,501 | 12,815 | 11,956 | 11,093 | 9,891 | | |
| 3 personnes | 18,061 | 17,115 | 15,996 | 14,880 | 13,244 | | |
| 4 personnes | 20,812 | 19,779 | 18,490 | 17,200 | 15,310 | | |
| 5 personnes | 24,252 | 22,963 | 21,415 | 19,952 | 17,803 | | |
| 6 personnes | 26,488 | 25,026 | 23,393 | 21,758 | 19,436 | | |
| 7 personnes ou plus | 29,155 | 27,606 | 25,801 | 23,994 | 21,415 | | |

Activité, recensement du Canada de 1981

| Canada | Recensement de 1981 (chiffres publiés en 1981) | Recensement de 1981 (selon le dépouillement de 1986) | Variation en % |
|-------------------------------------|--|--|-------------------|

| Inactifs | 5,325,505 | 5,322,815 | -0.05 |

ACTIVITÉ

Les concepts de l'activité au recensement n'ont pas changé entre 1981 et 1986. Par contre, le traitement des données a été modifié, ce qui a entrainé quelques différences. Au recensement de 1986, contrairement aux recensements antérieurs, on n'a posé aucune question sur la fréquentation scolaire. Cette question était utilisée pour le contrôle de la variable de l'activité, plus spécifiquement le chômage. Par conséquent, ces différences de traitement affectent la population en chômage et sont en grande partie concentrées dans le groupe d'âge des 15 à 19 ans. Le tableau ci-dessus indique l'ampleur de cet effet sur les données, au niveau du Canada.

ANNEXE 1. Population et logements privés occupés, par estimations des réserves indiennes et des établissements indiens partiellement dénombrés, Canada, provinces et territoires. 1986

Travailleurs spécialisés dans les sciences biologiques et agronomiques, n.c.a.

| 2151 | Ingénieurs métallurgistes |
|--------------|--|
| 2153 | Ingénieurs miniers |
| 2154 | Ingénieurs du pétrole |
| 2155 | Ingénieurs en aérospatiale |
| 2156 | Ingénieurs en sciences nucléaires |
| 2157 | Urbanistes |
| 2159 | Ingénieurs professionnels, n.c.a. |
| 2181 | Mathématiciens, statisticiens et actuaires |
| 2183 | Analystes de systèmes, programmeurs en informatique et travailleurs assimilés |
| 2311 | Économistes |
| 2313 | Sociologues, anthropologues et spécialistes assimilés |
| 2315 | Psychologues |
| 2319 | Travailleurs spécialisés en sciences sociales, n.c.a. |
| 2331 | Travailleurs sociaux |
| 2339 | Travailleurs sociaux et travailleurs des domaines connexes, n.c.a. |
| 2341 | Juges et magistrats |
| 2343 | Avocats et notaires |
| 2349 | Hommes de loi et travailleurs assimilés, n.c.a. |
| 2350 | Surveillants: personnel spécialisé des bibliothèques, musées et archives |
| 2351 | Bibliothécaires, archivistes et conservateurs |
| 2359 | Personnel spécialisé des bibliothèques, musées et archives, n.c.a. |
| 2391 | Conseillers en orientation pédagogique ou professionnelle |
| 2399 | Autres travailleurs en sciences sociales et domaines connexes, n.c.a. |
| 2511 | Ministres du culte |
| 2513 | Religieuses et frères |
| 2519 | Membres du clergé et assimilés, n.c.a. |
| 2711 | Professeurs d'université |
| 2719 | Professeurs d'université et personnel assimilé, n.c.a. |
| 2731 | Professeurs au niveau primaire et préscolaire |
| 2733 | Professeurs au niveau secondaire |
| 2739 | Professeurs d'école primaire et secondaire et personnel assimilé, n.c.a. |
| 2791 | Professeurs d'école technique et professionnelle |
| 2792 | Professeurs de beaux-arts, n.c.a. |
| 2793 | Professeurs au niveau post-secondaire, n.c.a. |
| 2795 | Professeurs d'enfance exceptionnelle, n.c.a. |
| 2799 | Autres enseignants et personnel assimilé, n.c.a. |
| 3111 | Médecins et chirurgiens |
| 3113 | Dentistes |
| 3115 3117 | Vétérinaires |
| 3117 | Ostéopathes et chiropracteurs |
| 3119 | Personnel spécialisé dans le diagnostic et le traitement des maladies, n.c.a. |
| 3130 | Surveillants: personnel spécialisé et auxiliaires des soins infirmiers et thérapeutiques |
| 3136 | Infirmiers autorisés, diplômés et infirmiers en formation |
| 3137 | Audiologistes et thérapeutes de l'élocution Physiothérapeutes |
| 3138 | Ergothérapeutes |
| 3151 | Pharmaciens |
| 3152 | Diététistes et nutritionnistes |
| 3153 | Optométristes |
| 3355 | Traducteurs et interprètes |
| 6116 | Officiers des forces armées |
| 3110 | Officers and for ped at HICCS |
| | |
| | 4. Semi-professionnels et techniciens |
| | |

2117 Technologues et techniciens en sciences physiques
 2119 Travailleurs spécialisés dans les sciences physiques, n.c.a.
 2135 Technologues et techniciens en sciences de la vie

| 2160 | Surveillants: autres travailleurs en architecture et en génie |
|--------------|---|
| 2161 | Arpenteurs-géomètres |
| 2163 | Dessinateurs techniques |
| 2164 | Technologues et techniciens en architecture |
| 2165 | Technologues et techniciens en génie |
| 2169 | Autres travailleurs en architecture et en génie, n.c.a. |
| 2189 | Travailleurs spécialisés dans les mathématiques, la statistique, l'analyse des systèmes et |
| 2100 | les domaines connexes, n.c.a. |
| 2333 | Personnel des services sociaux et communautaires |
| 2353 | Techniciens de bibliothèques, de musées et d'archives |
| 2797 | Instructeurs et moniteurs, n.c.a. |
| 3134 | Infirmiers auxiliaires autorisés |
| 3139 | Personnel spécialisé et auxiliaires des soins infirmiers et thérapeutiques, n.c.a. |
| 3154 | Maîtres opticiens |
| 3155 | Technologues et techniciens en radiologie |
| 3156 | Technologues et techniciens de laboratoire médical |
| 3157 | Denturologistes |
| 3158 | Hygiénistes dentaires et assistants dentaires |
| 3161 | Techniciens dentaires de laboratoire |
| 3162 | Techniciens en inhalation |
| 3169 | Autres travailleurs en médecine et en santé, n.c.a. |
| 3311 | Peintres, sculpteurs et autres artistes |
| 3313 | Dessinateurs de produits et décorateurs d'intérieur |
| 3314 | Dessinateurs publicitaires et illustrateurs |
| 3315 | Photographes et opérateurs de caméra |
| 3319 | Professionnels des beaux-arts, des arts commerciaux, de la photographie et des domaines |
| | connexes, n.c.a. |
| 3330 | Directeurs artistiques et metteurs en scène |
| 3331 | Chefs d'orchestre, compositeurs et arrangeurs |
| 3332 | Musiciens et chanteurs |
| 3333 | Travailleurs spécialisés de la musique et des divertissements musicaux, n.c.a. |
| 3334 | Danseurs et chorégraphes |
| 3335 | Acteurs |
| 3337 | Annonceurs à la radio et à la télévision |
| 3339 | Artistes et techniciens de la scène, de la radio et de l'écran, n.c.a. |
| 3351 | Écrivains et rédacteurs |
| 3359 3360 | Rédacteurs, n.c.a. |
| 3370 | Surveillants: travailleurs spécialisés des sports et loisirs |
| 3370 | Entraineurs, moniteurs et instructeurs des sports et loisirs Arbitres et officiels assimilés |
| 3373 | Arbitres et officiels assimiles Athlètes |
| 6141 | Directeurs de funérailles, embaumeurs et travailleurs assimilés |
| 9111 | |
| 9551 | Pilotes d'avions, navigateurs et mécaniciens navigants |
| 9001 | Opérateurs d'appareils de radiodiffusion et de télédiffusion |
| | |
| | 5. Surveillants |
| 4110 | Surveillants: sténographes et dactylographes |
| 4130 | Surveillants: teneurs de livres, commis en comptabilité et travailleurs assimilés |
| 4140 | Surveillants: opérateurs sur machines de bureau et de mécanographie |
| 4150 | Surveillants: magasiniers, ordonnanciers et distributeurs |
| 4160 | Surveillants: employés de bibliothèque, classeurs-archivistes, correspondanciers et |
| - | travailleurs assimilés |
| 4170 | Surveillants: réceptionnistes, hôtesses d'accueil, facteurs et messagers |
| 4190 | Surveillants: autres employés de bureau et travailleurs assimilés, n.c.a. |
| 5130 | Surveillants: vendeurs de marchandises |
| 5170 | Surveillants: vendeurs de services |
| | |

-

- 5190 Surveillants: autres travailleurs spécialisés dans la vente
- 6120 Surveillants: travailleurs spécialisés dans la préparation des aliments et boissons et services connexes
- 6130 Surveillants: travailleurs spécialisés dans les services de logement et les secteurs connexes

6. Contremaitres

- 6160 Surveillants: travailleurs spécialisés dans l'entretien des vêtements et des tissus
- d'ameublement
- 6190 Surveillants: autres travailleurs spécialisés dans les services
- Contremaîtres: autres travailleurs en agriculture, en horticulture et en élevage 7180
- 7510 Contremaîtres: travailleurs forestiers et bûcherons 7710 Contremaîtres: mineurs, carriers, foreurs de puits de pétrole et de gaz et travailleurs
- assimilés
- 8110 Contremaîtres: travailleurs spécialisés dans le traitement du minerai
- 8130 Contremaîtres: métallurgistes et travailleurs assimilés
- 8150 Contremaîtres: confectionneurs de produits en argile, en verre et en pierre et travailleurs assimilés
- 8160 Contremaîtres: travailleurs spécialisés dans le traitement de produits chimiques, du
- pétrole, du caoutchouc, du plastique et de matières analogues Contremaîtres: travailleurs de l'industrie des aliments et boissons et travailleurs assimilés
- 8210
- 8230 Contremaîtres: travailleurs de l'industrie du bois sauf pâte à papier et papier
- 8250 Contremaîtres: travailleurs de l'industrie de la pâte à papier et du papier et travailleurs
- assimilés
- 8260 Contremaîtres: travailleurs du textile
- 8290 Contremaîtres: autres travailleurs des industries de transformation
- 8310 Contremaîtres: usineurs de métaux
- 8330 Contremaîtres: faconneurs et formeurs de métal, sauf les usineurs
- 8350 Contremaîtres: travailleurs du bois à la machine
- 8370 Contremaîtres: travailleurs spécialisés dans le travail de l'argile, du verre, de la pierre, et des produits similaires
- 8390 Contremaîtres: autres usineurs et travailleurs des domaines connexes, n.c.a.
- 8510 Contremaîtres: travailleurs spécialisés dans la fabrication et le montage de produits métalliques, n.c.a.
- 8530 Contremaîtres: travailleurs spécialisés dans la fabrication, le montage l'installation et la réparation d'appareils électriques, électroniques et de matériel connexe
- 8540 Contremaîtres: travailleurs spécialisés dans la fabrication, le montage et la réparation de produits en bois
- 8550 Contremaîtres: travailleurs spécialisés dans la confection, le montage et la réparation de produits en textile, en fourrure et en cuir
- 8570 Contremaîtres: travailleurs spécialisés dans la fabrication, le montage et la réparation d'articles de caoutchouc, de plastique et de produits similaires
- 8580 Contremaîtres: mécaniciens et réparateurs, n.c.a.
- 8590 Contremaîtres: autres travailleurs spécialisés dans la fabrication, le montage et la réparation de produits
- 8710 Contremaitres: excavateurs, niveleurs, paveurs et travailleurs assimilés
- 8730 Contremaitres: monteurs, installateurs et réparateurs de matériel électrique, d'éclairage et
- de communications par fil
- 8780 Contremaitres: autres travailleurs du bâtiment 9110 Contremaîtres: personnel d'exploitation des transports aériens
- 9130 Contremaîtres: personnel d'exploitation des transports ferroviaires
- 9170 Contremaîtres: personnel d'exploitation des transports routiers
- 9190 Contremaîtres: autre personnel d'exploitation des transports
- 9310 Contremaîtres: manutentionnaires et travailleurs assimilés, n.c.a.
- 9510 Contremaîtres: imprimeurs et travailleurs assimilés
- 9530 Contremaîtres: mécaniciens de machines et d'installations fixes et travailleurs assimilés
- 9550 Contremaîtres: opérateurs de matériel électronique et de matériel de communication, n.c.a.

| 9590 | Contremaîtres: autres ouvriers qualifiés et conducteurs de machines, n.c.a. | |
|------|--|--|
| 9910 | Surveillants et contremaîtres, n.c.a. | |
| | | |
| | 7. Employés de bureau | |
| 4111 | Secrétaires et sténographes | |
| 4113 | Dactylographes et commis-dactylographes | |
| 4131 | Teneurs de livres | |
| 4133 | Caissiers | |
| 4135 | Commis d'assurances, de banques et de finances | |
| 4137 | Commis aux services statistiques | |
| 4139 | Teneurs de livres, commis en comptabilité et travailleurs assimilés, n.c.a. | |
| 4141 | Opérateurs sur machines de bureau | |
| 4143 | Opérateurs sur machines de mécanographie | |
| 4151 | Commis de production | |
| 4153 | Commis de réception et d'expédition | |
| 4155 | Commis d'approvisionnement et travailleurs assimilés | |
| 4157 | Peseurs | |
| 4159 | Magasiniers, ordonnanciers et distributeurs, n.c.a. | |
| 4161 | Commis de bibliothèque et de dossiers | |
| 4169 | Employés de bibliothèque, classeurs-archivistes, correspondanciers et travailleurs | |
| | assimilés, n.c.a. | |
| 4171 | Réceptionnistes et commis à l'information | |
| 4172 | Facteurs | |
| 4173 | Commis postaux | |
| 4175 | Téléphonistes | |
| 4177 | Messagers | |
| 4179 | Réceptionnistes, hôtesses d'accueil, facteurs et messagers, n.c.a. | |
| 4191 | Commis de perception | |
| 4192 | Estimateurs d'assurances | |
| 4193 | Commis d'agence de voyage, agents de gare, de billets et de marchandises | |
| 4194 | Réceptionnistes d'hôtel | |
| 4195 | Commis au personnel | |
| 4197 | Commis généraux de bureau | |
| 4199 | Autres employés de bureau et travailleurs assimilés, n.c.a. | |
| | 8. Employés du secteur de la vente | |
| 5131 | Vendeurs-techniciens et conseillers apparentés | |
| 5133 | Voyageurs de commerce | |
| 5135 | Vendeurs et commis-vendeurs de marchandises, n.c.a. | |
| 5141 | Vendeurs ambulants et colporteurs | |
| 5143 | Vendeurs de journaux | |
| 5145 | Commis de station-service | |
| 5149 | Vendeurs de marchandises, n.c.a. | |
| 5171 | Vendeurs et agents d'assurances | |
| 5172 | Courtiers en immeubles | |
| 5173 | Courtiers en valeurs | |
| 5174 | Agents de publicité | |
| 5177 | Agents de services commerciaux | |
| 5179 | Vendeurs de services, n.c.a. | |
| 5193 | Vendeurs-livreurs | |
| 5199 | Autres travailleurs spécialisés dans la vente, n.c.a. | |
| | | |

9. Employés du secteur des services

3132 Garcons de salle d'hôpital Aides-infirmiers 3135 3375 Travailleurs assimilés des sports et loisirs 3379 Travailleurs spécialisés des sports et loisirs, n.c.a. 6112 Policiers et détectives gouvernementaux 6113 Policiers et détectives privés 6115 Gardiens et préposés à des services de sécurité connexes 6117 Autres grades des forces armées 6119 Personnel spécialisé dans les services de protection, n.c.a. 6121 Chefs et cuisiniers 6123 Barmen 6125 Préposés au service des aliments et boissons 6129 Travailleurs spécialisés dans la préparation des aliments et boissons et services connexes. 6133 Préposés à l'entretien, à l'exception des domestiques 6135 Chasseurs et porteurs 6139 Travailleurs spécialisés dans les services de logement et les secteurs connexes, n.c.a. 6142 Bonnes à tout faire, domestiques et travailleurs assimilés 6143 Barbiers, coiffeurs et travailleurs assimilés 6144 Guides 6145 Préposés aux voyages et travailleurs connexes non spécialisés dans les aliments et boissons Travailleurs spécialisés dans le soin des enfants 6147 6149 Travailleurs spécialisés dans les services personnels, n.c.a. 6198 Manoeuvres et travailleurs assimilés dans les services 6199 Autres travailleurs spécialisés dans les services, n.c.a. 10. Travailleurs qualifiés et artisans 6111 Pompiers 7113 Eleveurs 7115 Exploitants de cultures de plein champ 7119 Exploitants agricoles, n.c.a. 7311 Capitaines et officiers de bateaux de pêche 7516 Inspecteurs, classeurs et mesureurs de bois et travailleurs assimilés 8311 Aiusteurs-outilleurs 8313 Machinistes et régleurs de machines-outils 8316 Inspecteurs, vérificateurs, trieurs et échantillonneurs de l'usinage des métaux 8333 Tôliers 8337 Chaudronniers, tôliers et ouvriers en charpente métallique 8351 Modeleurs sur bois 8395 Modeleurs et mouleurs, n.c.a. 8399 Autres usineurs et travailleurs des domaines connexes, n.c.a. 8515 Fabricants et monteurs d'aéronefs, n.c.a. 8533 Installateurs et réparateurs d'appareils électriques et de matériel connexe, n.c.a. 8535 Installateurs et réparateurs d'appareils électroniques et de matériel connexe, n.c.a. Dépanneurs de radios et de téléviseurs 8537 8553 Tailleurs et couturiers 8555 Fourreurs 8582 Mécaniciens et réparateurs d'aéronefs 8583 Mécaniciens et réparateurs de matériel ferroviaire 8584 Mécaniciens et réparateurs de machines industrielles, agricoles et de construction 8585 Mécaniciens et réparateurs de machine de bureau et de matériel mécanographique

Inspecteurs, vérificateurs, trieurs et échantillonneurs de la réparation du matériel

8586

8587

mécanique, n.c.a.

Réparateurs de montres et d'horloges

| 8588 | Mécaniciens et réparateurs d'instruments de précision | |
|--------------|---|------|
| 8731 | Poseurs de lignes électriques et travailleurs assimilés | |
| 8733 | Electriciens d'installation et d'entretien | |
| 8735 | Installateurs et réparateurs de lignes de communications par fil et matériel connexe | |
| 8736 | Inspecteurs, vérificateurs, trieurs et échantillonneurs du montage, de l'installation et de réparation du matériel électrique, d'éclairage et de communications par fil | e la |
| 8739 | Monteurs, installateurs et réparateurs de matériel électrique, d'éclairage et de communications par fil, n.c.a. | |
| 8781 | Charpentiers et travailleurs assimilés | |
| 8782 | Briqueteurs, maçons et carreleurs | |
| 8791 | Plombiers, tuyauteurs et travailleurs assimilés | |
| 8795 | Vitriers | |
| 8796 | Inspecteurs, vérificateurs, trieurs et échantillonneurs dans la construction, n.c.a. | |
| 9113 | Personnel de soutien des transports aériens | |
| 9131 | Mécaniciens et chauffeurs de locomotive | |
| 9151 | Officiers de pont | |
| 9153 | Officiers mécaniciens de navire | |
| 9511 | Typographes et compositeurs | |
| 9512 | Conducteurs de presses à imprimer | |
| 9512 | Stéréotypeurs et électrotypeurs | |
| 9514 | Graveurs en imprimerie sauf photograveurs | |
| 9514 | Photograveurs et travailleurs assimilés | |
| 9515 | Conducteurs d'installations de centrale électrique | |
| 9539 | Mécaniciens de machines et d'installations fixes et travailleurs assimilés, n.c.a. | |
| 9553 | Télégraphistes | |
| | | |
| 9555 | Opérateurs d'appareils d'enregistrement et de reproduction vidéo et sonores | |
| 9557 9559 | Projectionnistes de cinéma | |
| | Autres opérateurs de matériel électronique et de matériel de communication, n.c.a. | |
| 9599 | Autres ouvriers qualifiés et conducteurs de machines, n.c.a. | |
| | 11. Travailleurs manuels spécialisés | |
| 7183 | Ouvriers agricoles de l'élevage | |
| 7185 | Ouvriers agricoles de relevage Ouvriers agricoles de cultures de plein champ | |
| 7196 | Inspecteurs, vérificateurs, trieurs et échantillonneurs: autres travailleurs en agricultu | |
| 1196 | en horticulture et en élevage | e, |
| 7197 | Conducteurs de machines agricoles | |
| 7315 | Trappeurs et travailleurs assimilés | |
| 7511 | | |
| 7711 | Travailleurs spécialisés dans la conservation des forêts Foreurs sur installation rotary et travailleurs assimilés | |
| 7715 | Boutefeux et dynamiteurs | |
| 7717 | | |
| | Haveurs, manutentionnaires et chargeurs dans les mines et carrières | |
| 7719 | Mineurs, carriers, foreurs de puits de pétrole et de gaz et travailleurs assimilés, n.c.a. | |
| 8115 | Fondeurs et grilleurs de minerais | |
| 8116 | Inspecteurs, vérificateurs, trieurs et échantillonneurs dans le traitement du minerai | |
| 8131 | Travailleurs aux fours de fusion, de conversion et d'affinage des métaux | |
| 8135 | Lamineurs | |
| 8146 | Inspecteurs, vérificateurs, trieurs et échantillonneurs dans le traitement des métaux | |
| 8155 | Façonneurs de l'argile, du verre et de la pierre | |
| 8156 | Inspecteurs, vérificateurs, trieurs et échantillonneurs dans le traitement de produits er | |
| | argile, en verre et en pierre | |
| 8165 | Ouvriers à la distillation, à la sublimation et à la carbonisation de produits chimiques e | t de |
| | matières analogues | |
| 8176 | Inspecteurs, vérificateurs, trieurs et échantillonneurs dans le traitement de produits | |
| | chimiques, du pétrole, du caoutchouc, du plastique et de matières analogues | |
| 8235 | Ouvriers au traitement du bois | |
| 8251 | Préparateurs de pâte à papier cellulosique | |

Préparateurs de pâte à papier cellulosique

8256 Inspecteurs, vérificateurs, trieurs et échantillonneurs de l'industrie de la pâte à papier et du papier Tisserands 8267 8271 Tricoteurs 8296 Inspecteurs, vérificateurs, trieurs et échantillonneurs des industries de transformation. 8319 Usineurs de métaux, n.c.a. 8331 Forgerons 8335 Soudeurs et oxycoupeurs 8336 Inspecteurs, vérificateurs, trieurs et échantillonneurs du façonnage et du formage de métaux, sauf l'usinage 8339 Faconneurs et formeurs de métal, sauf les usineurs, n.c.a. 8356 Inspecteurs, vérificateurs, trieurs et échantillonneurs dans le travail du bois à la machine 8373 Ouvriers en abrasion et polissage de l'argile, du verre, de la pierre et des produits similaires 8376 Inspecteurs, vérificateurs, trieurs et échantillonneurs du travail de l'argile, du verre, de la pierre et des produits similaires 8379 Travailleurs spécialisés dans le travail de l'argile, du verre, de la pierre et des produits similaires, n.c.a. 8391 Graveurs, acidograveurs et travailleurs assimilés, n.c.a. 8396 Inspecteurs, vérificateurs, trieurs et échantillonneurs de l'usinage de produits, n.c.a. 8523 Fabricants et monteurs de machines industrielles, agricoles, de construction et autres, 8525 Fabricants et monteurs de machines de bureau, n.c.a. 8526 Inspecteurs, vérificateurs, trieurs et échantillonneurs de la fabrication et du montage de produits métalliques, n.c.a. 8536 Inspecteurs, vérificateurs, trieurs et échantillionneurs de la fabrication de montage, de l'installation et de la réparation d'appareils électriques, électroniques et de matériel connexe 8538 Manoeuvres et travailleurs assimilés de la fabrication du montage, de l'installation et de la réparation d'appareils électriques, électroniques et de matériel connexe 8546 Inspecteurs, vérificateurs, trieurs et échantillonneurs de la fabrication, du montage et de la réparation de produits en bois 8581 Mécaniciens et réparateurs de véhicules automobiles 8589 Autres mécaniciens et réparateurs, n.c.a. 8591 Josilliers et orfèvres 8592 Fabricants, monteurs et réparateurs d'embarcations 8783 Ouvriers en finissage du béton et travailleurs assimilés 8784 Plâtriers et travailleurs assimilés 8786 Travailleurs spécialisés dans l'isolation Ouvriers en couverture, en imperméabilisation et travailleurs assimilés 8787 8793 Monteurs de charpentes métalliques 8799 Autres travailleurs du bâtiment, n.c.a. Personnel d'exploitation des transports aériens, n.c.a. 9119 9133 Chefs de train et serre-freins 9135 Personnel de soutien des transports ferroviaires 9155 Matelots de pont 9157 Personnel de chaufferie et de chambre des machines 9159 Personnel d'exploitation des transports maritimes, n.c.a. 9171 Conducteurs d'autobus

9173

9175

9179

9191

9199

9311

9517

Chauffeurs privés et de taxi

Conducteurs de métro et tramways

Relieurs et travailleurs assimilés

Conducteurs d'appareils de levage, n.c.a.

Personnel d'exploitation des transports routiers, n.c.a.

Autre personnel d'exploitation des transports, n.c.a.

Conducteurs de camion

| 9591 | Ouvriers en développement photographique | |
|------|---|--|
| 9916 | Inspecteurs, vérificateurs, trieurs et échantillonneurs: n.c.a. | |
| 9919 | Autres travailleurs, n.c.a. | |
| 3313 | Figure 65 of a variety and, in v. a. | |
| | | |
| | 12. Autres travailleurs manuels | |
| 6162 | Nettoyeurs et blanchisseurs | |
| 6165 | Presseurs | |
| 6169 | Travailleurs spécialisés dans l'entretien des vêtements et des tissus d'ameublement, n.c.a. | |
| 6191 | Concierges, employés des services domestiques et du nettoyage | |
| 6193 | Conducteurs d'ascenseurs et de monte-charge | |
| 7195 | Ouvriers pépiniéristes et assimilés | |
| 7199 | Autres travailleurs en agriculture, en horticulture et en élevage, n.c.a. | |
| 7313 | Pêcheurs au filet, au filet de fond et à la ligne | |
| 7319 | Pêcheurs, trappeurs et travailleurs assimilés, n.c.a. | |
| 7513 | Bûcherons et travailleurs assimilés | |
| 7517 | Travailleurs spécialisés dans le levage, le triage et le transport des billes et travailleurs assimilés | |
| 7518 | Manoeuvres et travailleurs assimilés de l'exploitation forestière | |
| 7519 | Travailleurs forestiers et bûcherons, n.c.a. | |
| 7713 | Foreurs des roches et du sous-sol | |
| 7718 | Manoeuvres et travailleurs assimilés des mines, des carrières et des puits de pétrole et de | |
| | gaz | |
| 8111 | Ouvriers au concasseur et au broyeur du minerai | |
| 8113 | Conducteurs de mélangeurs, de séparateurs et d'appareils de filtrage du minerai et | |
| | travailleurs assimilés | |
| 8118 | Manoeuvres et travailleurs assimilés dans le traitement du minerai | |
| 8119 | Travailleurs spécialisés dans le traitement du minerai, n.c.a. | |
| 8133 | Travailleurs spécialisés dans le traitement thermique des métaux | |
| 8137 | Mouleurs, noyauteurs et couleurs de métaux | |
| 8141 | Profileurs et étireurs de métaux | |
| 8143 | Galvaniseurs, métalliseurs et travailleurs assimilés | |
| 8148 | Manoeuvres et travailleurs assimilés dans le traitement des métaux | |
| 8149 | Métallurgistes et travailleurs assimilés, n.c.a. | |
| 8151 | Conducteurs de fours et de séchoirs dans le traitement de l'argile, du verre et de la pierre | |
| 8153 | Opérateurs de séparateurs, de broyeurs, de concasseurs et de malaxeurs dans le traitement de l'argile, du verre et de la pierre | |
| 8158 | Manoeuvres et travailleurs assimilés dans le traitement de produits en argile, en verre et en | |
| 0100 | pierre | |
| 8159 | Confectionneurs de produits en argile, en verre et en pierre et travailleurs assimilés, n.c.a. | |

OÙ NOUS TROUVER?

Les centres régionaux de consultation de Statistique Canada offrent la gamme complète des produits et services du recensement. On y trouve une bibliothèque et un comptoir de vente où les utilisateurs peuvent consulter ou acheter des publications du recensement, des disquettes de micro-ordinateurs, des microfiches, des cartes et plus encore. Chaque centre vous offre la possibilité d'extraire de l'information des systèmes de retrait de données automatisées CANSIM et TELICHART de Statistique Canada. Un service de renseignements téléphonique est également disponible; ce service est gratuit pour les clients es trouvant à l'extérieur des services d'appel locaux. On y offre également plusieurs autres services utiles, allant des séminaires aux consultations. Pour obtenir des renseignements, téléphonez ou écrivez au centre de consultation de votre région. Pour une description concise des produits et services du recensement de 1936, se reporter à la section "Lignes directrices pour l'utilisation de cette publication".
